Professional Summary

Detail-oriented **Data Analyst** with **3+ years of experience** in building and analyzing large datasets, creating interactive dashboards, and delivering actionable insights across **healthcare** and **banking** domains. Proficient in **SQL, Python, R, Tableau, Power BI, and Excel**, with expertise in **data cleaning, ETL, statistical modeling, and business reporting**. Skilled in leveraging **AWS, Azure, and Snowflake** to build scalable data pipelines and ensure data quality. Adept at collaborating with cross-functional teams to support **data-driven decision making**.

Technical Skills

- **Data Analysis & Visualization:** Tableau, Power BI, Excel (Pivot Tables, VLOOKUP, Macros), Matplotlib, Seaborn
 - **Programming & Scripting:** Python (Pandas, NumPy, Scikit-learn, Matplotlib), R (ggplot2, dplyr)
 - **Databases:** SQL Server, MySQL, PostgreSQL, Oracle, Snowflake
 - **ETL / Data Processing:** SQL, Pandas, SSIS, Talend, dbt
 - **Cloud Platforms:** AWS (S3, Redshift, Glue, Athena), Azure (Data Factory, Synapse, Blob Storage)
 - **Statistical & ML Tools:** Regression, Hypothesis Testing, Time Series Analysis, Clustering, Classification
 - **Others:** Agile/Scrum, JIRA, Git/GitHub, Data Warehousing (Star & Snowflake Schema), Data Governance
-

Professional Experience

Data Analyst | Elevance Health | Atlanta | GA

Project: Healthcare Analytics and Patient Data Insights

June 2024 – Present

- Designed and developed **ETL pipelines** using **Azure Data Factory** and **AWS Glue** for healthcare claims and patient data ingestion.
- Created **Power BI dashboards** for executives to monitor patient outcomes, claims processing efficiency, and provider performance.
- Applied **predictive analytics models in Python** to forecast patient readmission risks and treatment effectiveness.
- Performed **data cleansing, transformation, and standardization** using **SQL and Pandas** to ensure HIPAA compliance and accuracy.
- Built **star schema and snowflake schema** models in **Azure Synapse** for healthcare reporting.
- Implemented **data quality checks** and validation rules to improve trust in analytics deliverables.
- Developed **Excel-based financial reports** for cost analysis and operational performance.
- Leveraged **R (ggplot2, dplyr)** for statistical modeling and advanced visualization of patient care data.
- Configured **Azure Blob Storage and AWS S3** for secure data storage and archival.
- Integrated **JIRA** and Agile workflows for tracking user stories and analytical deliverables.
- Partnered with business stakeholders and clinicians to translate **business requirements into BI solutions**.

Environment: Azure Data Factory, Azure Synapse, AWS Glue, Python, Pandas, NumPy, R, Tableau, Power BI, Excel, SQL Server, PostgreSQL, Azure Blob Storage, Snowflake, JIRA, Agile/Scrum

Data Analyst | CMC | Hyd | India

Project: Enterprise Banking Data Analytics & Reporting

June 2021 – July 2023

- Developed and optimized **SQL queries** to extract, transform, and analyze transactional and customer data from multiple relational databases.
- Built **interactive dashboards in Tableau and Power BI** to track key KPIs such as loan performance, credit risk, and transaction trends.
- Automated **ETL workflows** using **SQL Server Integration Services (SSIS)** and **Python scripts**, reducing manual reporting efforts by 60%.
- Applied **statistical models** to assess risk scores and predict customer churn using **Python (Scikit-learn)**.
- Conducted **data cleaning and preprocessing** using **Pandas** and **NumPy**, improving reporting accuracy by 35%.
- Partnered with stakeholders to identify **data-driven opportunities** for reducing fraud and enhancing customer experience.
- Integrated data from **Excel, CSV, and API sources** into a centralized reporting database.
- Performed **ad-hoc analysis** to support compliance reporting for RBI and Basel requirements.
- Designed **stored procedures and views** to standardize reporting processes across teams.
- Collaborated in an **Agile/Scrum** environment, providing sprint deliverables and demo presentations.
- Supported **migration of data warehouse to Snowflake**, ensuring scalability and cost-optimization.

Environment: SQL Server, MySQL, Python, Pandas, NumPy, Tableau, Power BI, Excel, SSIS, Snowflake, Git, Agile/Scrum

Education

- Master of Science in Computer Science – University of Central Missouri, Kansas | 2023 – 2025
 - Bachelor of Technology in Computer Science and Engineering – JB Institute of Engineering and Technology, Hyderabad, India | 2019 – 2023
-

Certifications

- Microsoft Certified: Data Analyst Associate (Power BI)
 - AWS Certified Data Analytics – Specialty
 - Tableau Desktop Specialist
-
