EDUCATION

Indiana University, Luddy School of Informatics, Computing, and Engineering, Bloomington, IN

May 2024

Bachelor of Science in Informatics

GPA: 3.3/4.0

Minor: Criminal Justice, **Cognate:** Business, **Concentration:** Cybersecurity

Awards and Honors: Eagle Scout (2017)

TECHNICAL SKILLS

- **Programming Languages:** Python, HTML5, CSS, PHP, MySQL, C
- **Operating System:** Microsoft Windows, Unix (Linux)
- **Design Software Tools:** Adobe (Photoshop, Illustrator, XD, Acrobat), Figma, Canva, Autodesk Fusion 360
- **Productivity Suites:** Microsoft Office (Access, Excel)
- **Miscellaneous:** Arduino

PROJECTS

UN Sustainable Development Goals Resource Management Game

January 2024 – May 2024

- Crafted a resource management game in C language comprising 100 lines of code based on the 17 UN Sustainable Development Goals, integrating save and load functionalities to store data independently from the index file.
- Implemented two typedef structs and a global variable to streamline code functionality, significantly enhancing the game's performance after rigorous debugging.
- Initiated with zero resources per goal, the game dynamically saves resource allocations in a distinct file, allowing users to monitor stats and resource allocation. Upon reopening the saved game, allocated resources are seamlessly incremented for continued gameplay.

Bloomington PlateSavers

August 2023 – April 2024

- Orchestrated a comprehensive food preservation project with a team of four peers, culminating in the development of a user-friendly Google login and profile interface using PHP and MySQL.
- Implemented an organized workflow via GitHub, utilizing separate branches for individual design pages, resulting in seamless collaboration, and streamlined version control.
- Regularly interfaced with faculty members biweekly to discuss project progression and solicit feedback and presented project findings on food insecurity solutions to a large audience at the Zion Virtual Event Platform, effectively highlighting the project's significance.

EXPERIENCE

GBCS Group, Calgary, Alberta, Canada

August 2023 – March 2024

User Interface/User Experience Graphic Design Intern

- Collaborated with the design team at GBCS Group to develop and refine client websites using Figma, actively participating in the presentation of designs to the CEO.
- Enhanced graphic design elements for company brochures, contributing to the overall brand identity.
- Engaged in meetings with the CEO and key stakeholders to review progress, present design iterations, and ensure alignment with project objectives.

TechPoint, Indianapolis, IN

May 2023 – August 2023

Xplore Program Xtern

- Engaged in immersive simulations with leading technology firms, honing Python proficiency and refining professional writing skills.
- Fostered valuable connections with industry leaders to gain firsthand understanding of technology roles and expectations, enriching career exploration.
- Shared insights gleaned from experiences and outlined future career aspirations in presentations to Xplore counselors, contributing to personal and programmatic growth initiatives.
