

Amartya Sharma Data Analyst

amartyasharma95@gmail.com | (404) 988-7174 | USA | [Linkedin](#)

Summary

Results-driven Data Analyst with 4+ years of strong experience in data analysis, visualization, and statistical modeling. Skilled in SQL, Python, R, and various data visualization tools like Power BI and Tableau. Adept at extracting, cleaning, and transforming complex datasets to provide actionable insights. Proficient in ML, ETL processes, and ensuring data integrity. Strong collaborator, skilled in working with cross-functional teams in Agile settings to deliver data-driven solutions improving decision-making and business performance.

Technical Skills

- **Data Analysis & Modeling:** SQL (Joins, Window Functions, CTEs), Python (Pandas, NumPy, SciPy, Seaborn, datetime), R (quantmod)
- **Machine Learning:** Isolation Forest (fraud detection), Random Forest
- **Database & ETL:** AWS Athena, AWS Glue, Azure SQL Database, AWS S3
- **Data Validation & Quality:** Python (PyTest), Excel, LOD Expressions
- **Data Visualization:** Power BI (DAX, Drill-downs, Conditional Formatting), Tableau (Advanced Dashboards, Parameter Controls)
- **Collaboration & Methodologies:** Agile, Cross-functional Team Collaboration, Data Engineering, Risk Management

Professional Experience

Data Analyst, Frost Bank11/2024 – Present | Remote, USA

- Worked on Fraud Detection Analysis for Card Transactions, utilizing anomaly detection and pattern recognition techniques to identify fraudulent activities. Collaborated with the Fraud Prevention and Data Science teams in Agile sprints to meet project objectives.
- Utilized SQL (Joins, Window Functions) with AWS Athena to query transaction data from the bank's operational databases. Integrated data from AWS S3 storage, optimizing extraction speed and accuracy by 30%, while collaborating with Data Engineering teams.
- Developed Python scripts using Pandas, NumPy, SciPy, and Seaborn for data analysis, feature engineering, and statistical modeling. Automated data processing pipelines, improving overall analysis efficiency by 35% for data consistency across multiple sources.
- Conducted clustering analysis using K-means and correlation studies on card transaction datasets. Implemented the Isolation Forest machine learning model to identify outliers and fraudulent transactions. Increased fraud detection accuracy by 32% and reduced false-positive rates by 20%.
- Validated transactional data using Python's PyTest library and automated ETL pipelines via AWS Glue. Team up with the Data Engineering and IT teams for real-time data validation, reducing data discrepancies by 28% and improving reporting consistency.
- Designed and implemented Power BI dashboards, utilizing advanced features like drill-downs, conditional formatting, and DAX to deliver real-time fraud alerts and KPIs to the Risk and Fraud teams. Improved reporting clarity and decision-making speed by 40%.

Associate Data Analyst, Franklin Templeton01/2020 – 07/2023 | Remote, Hyderabad, India

- Developed a wide dashboard to monitor Franklin Templeton's mutual fund performance, enhancing tracking, risk analysis, and reporting clarity by 35% via Agile collaboration with advisory and product teams across Equity, Debt, Hybrid, and ELSS funds.
- Extracted years of NAV, AUM, and historical data from Morningstar API and Azure SQL Database, using SQL Window Functions and CTEs, improving query performance by 28% and enabling accurate fund tracking and aggregation.
- Implemented a Random Forest model to analyze correlations and time-series trends, identifying underperforming funds and improving predictive insight accuracy by 32%, enabling the Strategy team to take action on lagging fund indicators.
- Developed Python scripts using Pandas, NumPy, and datetime to automate data transformation processes, reducing preprocessing time by 41%, and worked closely with data engineering to ensure seamless integration with fund performance data pipelines.
- Applied R's quantmod package to analyze rolling returns and volatility trends, providing detailed risk analysis and improving assessment accuracy by 22%, supporting Research in benchmarking funds against Nifty 50 and BSE sector indices.
- Performed data validation using Excel, LOD expressions, and Azure Data Factory pipelines to ensure 96% data accuracy, enhancing reporting reliability and supporting audit readiness while reducing discrepancies in monthly mutual fund performance reports.
- Designed and applied an interactive Tableau dashboard with advanced filters, parameter controls, and trendlines, enabling fund managers to monitor performance across categories and geographic slices in real-time, increasing decision-making speed by 37%.

Education

Georgia Institute of Technology Master of Science in Electrical & Computer Engineering	Atlanta, GA, USA 08/2023 – 12/2024
Birla Institute of Technology and Science (BITS) Bachelor of Engineering in Electrical & Electronics Engineering Master of Science in Chemistry	Pilani – Goa Campus, Goa, India 08/2014 – 08/2019
