EXPERIENCE

Software Engineer

January 2024 – December 2024

Oakwin

City, State

- Designed and developed web applications using C# and ASP.NET Core, delivering high-performance and scalable solutions
- Implemented RESTful APIs and integrated third-party services to enhance application functionality and user experience
- Utilized Entity Framework and SQL Server for efficient data access and management in .NET applications
- Collaborated in Agile teams using Azure DevOps for task management, ensuring timely delivery of quality software

AI Engineer

Jan 2024 – May 2025

InpharmD

Atlanta, GA

- Built a medical search engine using Flask that scraped PubMed and GoogleScholar to deliver clinical responses to medical queries.
- Implemented multi-threaded processing and TFIDF in Python, ranking to reduce response time to an average of 10 seconds.
- Implemented finetuned LLMs on biomedical data, increasing context relevance and response accuracy during user responses.

Software Engineer

May 2025 – Present

HomeReelz

Remote

- Created a mobile app frontend using React Native and Typescript to deliver a real estate content creation platform for real estate agents.
- Integrated Firestore for live data sync and used React query to reduce database lookups through cache-first patterns.
- Deployed backend to Docker with CI/CD pipelines, ensuring consistency across development and production environments
- Used SQL(Postgres) database to ensure consistent data relations

PROJECTS

Study Match | *Next.js, Node.js, Redis, WebSockets*

GitHub

- Built a system to match students with study partners, using React frontend, Node.js backend, Express and MongoDB.
- Created a real-time chat system supporting simultaneous users using WebSockets and Redis pub/sub.
- Integrated Redis caching for study match recommendations, reducing repeated DB lookups by 60%.

Unwind – Trauma Release App | *React Native, TypeScript, Node.js, Firestore, Firebase, GCP Cloud Run*

App Store

- Developed a cross-platform mobile app with **React Native + TypeScript**, providing guided trauma release exercises through an intuitive UI.
- Architected and deployed a **Dockerized Node.js backend** on **GCP Cloud Run**, enabling autoscaling and reduced server management overhead.
- Implemented **Firestore and Firebase** for secure authentication, real-time updates, and cloud storage to streamline user experience.
- Released to the **App Store**, with production-ready CI/CD pipelines for seamless updates and monitoring of app health and performance.

TECHNICAL SKILLS

Languages: Python, TypeScript/JavaScript, Java, C

Frontend: React.js, React Native, Next.js, Tailwind, WebRTC, HTML5/CSS3

Backend: Node.js, Express.js, REST, WebSocket, Django, FastAPI

Databases: Supabase, Firestore, Redis, Postgres, MongoDB

DevOps & Tools: Docker, Git, AWS, Postman, Jira, Kubernetes

CERTIFICATIONS

AWS Certified Cloud Practitioner (CCP)

[View Certificate](#)

EDUCATION

Georgia State University

Atlanta, GA

Bachelor of Science in Computer Science

Expected May 2025

- GPA: 3.7/4.0
- President's List (Spring 2024, Summer 2024), Dean's List (Fall 2024)
