

AROHI SORATHIYA

Business Systems Analyst

Chicago, IL | +1 (773) 739-4957 | Arohipatel162@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Business Systems Analyst with 5+ years of experience in business requirements gathering, process analysis, and Agile project delivery across fintech and enterprise environments. Skilled in preparing BRDs, FRDs, User Stories, BPMN, and RTMs, while collaborating with business and technical stakeholders to deliver scalable solutions. Experienced in SQL, Power BI, REST APIs, Jira, Confluence, Salesforce, and ServiceNow, with hands-on expertise in AI-powered tools including Microsoft Copilot, ChatGPT Enterprise, Azure OpenAI, and Claude AI to streamline documentation and improve productivity. Strong track record of driving data-driven decisions, process improvements, and successful project delivery.

TECHNICAL SKILLS

Business Analysis: Business Requirements Gathering, BRD, FRD, User Stories, Use Cases, Gap Analysis, Process Mapping, BPMN 2.0, UML, Requirement Traceability Matrix (RTM), SWOT Analysis

AI & Automation: ChatGPT Enterprise, Microsoft Copilot, Azure OpenAI, Claude AI, Prompt Engineering, AI-Assisted Documentation, Intelligent Process Automation, AI Workflow Optimization

Project & Agile Tools: Jira, Confluence, Azure DevOps, Rally, Trello, Scrum, Kanban, SAFe Agile

Data Analysis & BI: SQL, Power BI, Tableau, Excel (Power Query, Pivot Tables, Power Pivot), Snowflake, Databricks

Business Process Modeling: Visio, Lucidchart, Miro, Draw.io, Figma

CRM & Enterprise Applications: Salesforce, ServiceNow, SAP, Workday, ERP Systems, CRM Platforms

Integration & APIs: REST APIs, Postman, Swagger/OpenAPI, JSON, XML

Cloud & Databases: Azure, AWS, Snowflake, SQL Server, Oracle, MySQL, PostgreSQL

Testing & Documentation: UAT, SIT, Test Case Design, Test Plans, Defect Management, QA Validation, Release Documentation

Methodologies: SDLC, Agile, Scrum, Waterfall, Hybrid Delivery, Change Management

PROFESSIONAL EXPERIENCE

Business Systems Analyst — Wells Fargo, USA

Jul 2025 – Present

- Gathered and analyzed business requirements with stakeholders, creating BRDs, FRDs, User Stories, BPMN diagrams, and RTMs using Jira, Confluence, Visio, and Lucidchart, reducing requirement clarification by 35% and improving sprint readiness by 30%.
- Leveraged Microsoft Copilot, ChatGPT Enterprise, Azure OpenAI, and Claude AI to automate requirement documentation, meeting summaries, and process analysis, increasing business analysis productivity by 40%.
- Analyzed REST API integrations using Postman, Swagger, JSON, and XML across Salesforce, ServiceNow, and ERP systems, reducing integration defects by 30% before production releases.
- Partnered with Data Engineering teams using SQL, Snowflake, Databricks, Power BI, and Tableau to develop executive dashboards and KPI reports, improving reporting efficiency by 45% and enabling data-driven decisions.
- Supported Agile/SAFe SDLC by facilitating backlog refinement, sprint planning, UAT, SIT, defect management, and release validation using Jira and Azure DevOps, achieving 98% on-time sprint delivery and reducing post-production issues by 25%.

Associate Business Analyst — Hexaware Technologies, India

Jul 2019 – Aug 2023

- Partnered with business users, Product Owners, and technical teams to analyze business needs and translate them into BRDs, FRDs, User Stories, Use Cases, and BPMN process flows using Jira, Confluence, and Visio, improving requirement quality and reducing rework by 30%.
- Conducted business and data analysis using SQL and Excel to evaluate payment transactions, identify process gaps, and support reconciliation activities, improving data accuracy and reducing reporting inconsistencies by 22%.
- Defined functional requirements for REST API integrations between merchant platforms, payment gateways, and banking systems while collaborating with developers and QA teams using Postman, Swagger, JSON, and XML, reducing integration issues by 25%.
- Facilitated Agile delivery by supporting Sprint Planning, Backlog Refinement, SIT, UAT, defect tracking, and release validation, while building Power BI dashboards for operational KPIs, improving reporting efficiency by 60% and achieving 95% defect resolution before production.

Jr. Business Analyst — KFin Technologies Ltd, India

Jul 2018 – Jun 2019

- Assisted Senior Business Analysts in gathering and documenting business requirements by preparing BRDs, FRDs, Use Cases, process flows, and functional specifications using Microsoft Office, Visio, and Confluence, improving documentation quality by 25% and supporting successful project delivery.
- Performed SQL-based data validation and reconciliation across operational databases to verify customer and transaction data, identify discrepancies, and improve data accuracy by 20%, while supporting business reporting and decision-making.
- Supported Agile SDLC activities by participating in Sprint Planning, requirement reviews, SIT/UAT, defect tracking in Jira, and stakeholder walkthroughs, collaborating with QA and development teams to achieve a 96% first-cycle test pass rate and maintain complete requirement traceability.

EDUCATION

Master of Science in Information Systems — DePaul University, Chicago, IL

Sep 2023 – Jun 2025

Teaching Assistant – Business Process Modeling & Enterprise Systems

- Mentored students in Business Process Modeling (BPMN), Data Flow Diagrams (DFDs), SDLC methodologies, and enterprise requirements documentation.

Bachelor of Engineering in Information Technology

Aug 2014 – Jun 2018

Gujarat Technological University, Ahmedabad, India
