ABOUT ME

I'm a recent Computer Science graduate with hands-on experience in business analysis, UX/UI design, and web development through coursework, self-driven projects, and team-based simulations. I recently completed a business analysis training program where I practiced eliciting requirements, mapping processes, and creating user stories using tools like JIRA, Visio, and Confluence. In college, I collaborated on projects ranging from Android apps to interactive websites, applying languages like HTML, CSS, JavaScript, and Kotlin to deliver functional prototypes. I enjoy solving problems with both creativity and structure, and I'm eager to grow in roles like QA Analyst, Technical Business Analyst, or Technical Support—where I can continue learning, contribute to team success, and bridge the gap between users and technology.

SKILLS & ABILITIES

- | | | |
|----------------------------|---------------------|--|
| • Excellent Communication | • Microsoft Visio | • SharePoint |
| • Requirements Elicitation | • Jira | • SQL |
| • Stakeholder Management | • Balsamiq | • UX/UI Design, Figma, Mockplus |
| • SDLC Methodologies | • Confluence | • Java, C++, HTML, CSS, JavaScript |
| • Analytical Thinking | • Tableau, Power BI | • Node.js & React.js Libraries, Kotlin |

EDUCATION

Bachelor of Science in Computer Science
Towson University

December 2024

GPA: 3.3

EXPERIENCE

Junior Business Analyst Intern
TBS Solutions LLC

08/2025-11/2025

- Facilitate workshops and interview sessions to elicit requirements from business SMEs in multiple departments, stakeholders, and other company staff.
- Responsible for working on both Waterfall/Traditional and Agile projects within the organization.
- Clearly document epics, features, user stories, and acceptance criteria for Agile projects using Jira.
- Create Use Case diagrams using UML methodology and Process flow diagrams to represent “as-is” and “to-be” business processes.
- Design wireframes and screen mockups to guide and solicit feedback from stakeholders during workshops or interviews, and to verify requirements.
- Attend Agile Scrum daily stand-ups, sprint planning, backlog grooming, sprint review, and sprint retrospective meetings for Agile projects.
- Participate in project weekly status meetings and provide the status of all assigned business analysis tasks.

Business Analysis Training
TBS Solutions LLC

04/2025-05/2025

- Completed a comprehensive training program covering the full business analysis lifecycle, including requirement gathering, stakeholder analysis, and solution assessment.
- Gained hands-on experience with tools like JIRA, Confluence, Tableau, Microsoft Visio to create user stories, process maps, and functional documentation.
- Practiced key methodologies such as Agile, Waterfall, and Scrum to simulate real-world business environments
- Developed mock project deliverables such as BRDs (Business Requirement Documents), Use Cases, and User Stories.
- Strengthened critical thinking, communication, and problem-solving skills through case studies and project simulations.

Keyholder/Manager
IT'SUGAR

01/2024-08/2025

- Managed transactions and sales reporting using point-of-sale (POS) systems, troubleshooting errors to ensure accuracy.
- Analyzed sales data to identify purchasing trends, aiding inventory management. Trained new employees on store procedures and POS systems, enhancing team efficiency.
- Assisted in setting up in-store displays and received recognition for outstanding customer service.

- Conducted interviews with the manager to improve the hiring process by selecting qualified candidates.

PROJECTS

Digital Design & UX Job Simulation Bp

07/2023-02/2024

- Created comprehensive user personas to identify target audience needs and designed both low- and high-fidelity wireframes to structure and refine the application's interface.
- Developed polished prototypes, adhering to branding guidelines, and enhanced usability using beginner-level UX/UI design tools.
- Proactively learned and adapted to new design methodologies and technologies.

Logo Design VitalCare LLC

01/2024-02/2024

- Conceptualized and created a logo for a business, utilizing beginner-level graphic design software to bring the vision to life.
- Collaborated with the owner to align brand identity and objectives, demonstrating creativity, adaptability, and responsiveness to feedback.
- Self-learned and researched to enhance design skills throughout the project.

TrackIt Group Project

08/2024-12/2024

- Designed and developed an Android application using Kotlin and Jetpack Compose, incorporating features such as task management, a login and sign-up screen, and intuitive navigation.
- Implemented composables, modifiers, mutable state, event handling, error handling, ViewModel, and LazyColumn to enhance user experience and functionality.

Library Book Trading Website Group Project

08/2024-12/2024

- Collaborated on designing a website where users can trade books, focusing on user- friendly interface design and navigation.
- Utilized HTML, CSS, and JavaScript to develop front-end components and implement searching within a specific zip code.
- Worked as part of a team to effectively meet project milestones and deliver a functional prototype.

PROFESSIONAL AFFILIATION

08/2023-05/2024

Sister Scripters Member

Attended meetings, workshops, and information sessions. Connected with other members through Discord to discuss personal, professional, and academic goals.
