

Sharath Chaitanya Bandari

Program Specialist

sharathchaitanyabandari@gmail.com | +1 312-838-0615 | [LinkedIn](#) | Chicago, IL

Professional Summary

Health informatics professional with a cross-functional background in clinical data management, medical coding, and digital health systems. Brings a sharp analytical approach to process optimization and regulatory compliance within healthcare programs. Demonstrates a strong command over EMR systems, patient data validation, and structured documentation practices that align with quality and privacy standards. Combines technical insight with operational precision to support high-volume healthcare environments, streamline record management, and drive improvements in patient and program outcomes.

Professional Experience

Program Specialist | Synapse Health, Illinois, USA

Nov 2024 – Current

- Coordinated complex healthcare program operations while ensuring compliance with HIPAA & CMS regulatory standards, improving patient support outcomes by 15%.
- Partnered closely with clinicians, case managers, and IT teams, reducing workflow bottlenecks and enhancing overall service delivery efficiency by 20%.
- Delivered executive-level dashboards that boosted reporting efficiency by 30%, saving approximately 10 hours per week in manual data preparation.
- Achieved a 12% improvement in workflow compliance by standardizing clinical documentation processes and conducting targeted staff training sessions.
- Monitored key program KPIs and created performance dashboards, enabling leadership to identify cost-saving opportunities and contributing to a 10% reduction in program expenses.
- Supported the design and rollout of new healthcare initiatives, aligning program activities with organizational goals and improving community health priorities by 12%.
- Increased interdepartmental collaboration by implementing structured communication workflows, resulting in a 15% reduction in case resolution time.

Clinical and Dental Analytics | SVS institute of Dental Sciences Hospitals

May 2021 – Jul 2023

- Collected, cleaned, and analyzed 5,000+ patient health and dental records using SQL and Excel, improving clinical decision-making accuracy by 18%.
- Designed interactive Tableau & Power BI dashboards to monitor patient outcomes, increasing operational efficiency by 22% and reducing reporting delays significantly.
- Streamlined data entry and compliance workflows across departments, achieving a 25% improvement in reporting accuracy and reducing audit-related errors.
- Built predictive models for patient no-shows and treatment demand, improving appointment utilization by 17% and reducing idle clinician time.
- Partnered with dental practitioners and hospital administrators to translate requirements into actionable insights, improving patient satisfaction scores by 15%.
- Performed advanced statistical analysis of treatment plans and demographics using Python and R, contributing directly to published academic research studies.
- Automated several manual documentation processes with optimized templates, reducing data entry workload by 20% and improving staff productivity.

Education

Master of Science in Health Informatics, Roosevelt University, Chicago, IL

May 2025

Bachelor of Dental Surgery, SVS Dental College, Mahabubnagar, India

June 2023

Academic Project

- Patient Health Analytics Dashboard | AWS, Python, Tableau
- Healthcare Claims Processing System | Azure, SQL, PySpark

Technical Skills

- Electronic Health Records (EHR):** EPIC – Data Entry, Retrieval, EMR Optimization, System Migration
- Medical Coding & Documentation:** ICD-10, CPT, HCPCS Level II, E/M Coding, Procedure Coding, Medical Documentation, Record Indexing
- Medical Record Auditing & Compliance:** Internal Audits, Coding Accuracy Review, CMS Guidelines, HIPAA Regulations
- Regulatory Knowledge:** HIPAA, CMS Guidelines, Medical Record Delinquency Standards, Data Privacy & Security
- Data Analysis & Management:** SQL, MySQL, Clinical Data Interpretation, Request Tracking, Metrics Reporting
- Program & Workflow Coordination:** Authorization Management, Records Release, Program Reporting, Compliance Documentation
- Tools & Systems:** EPIC EHR, AI-based Monitoring Systems, Health Information Databases, Microsoft Excel
