EDUCATION

Bachelor of Science in Computer Science

Texas A&M University - San Antonio

- Jan '23 - May '25
- GPA: 3.64

Associate of Science

San Antonio College

- Aug '20 - Dec '22
- GPA: 3.83

SKILLS

- Communication
- Color Theory
- Problem solving
- Time management
- Leadership
- Creativity
- Decision-making
- Web Design
- Programming
- Learning
- Organisation
- Critical thinking

PROJECTS

Flask-Blog

- Built using Flask framework along with SQLAlchemy for data persistence.
- Passed data from the back-end to the front-end using flask routes and jinja2 templating language.
- Implemented an API to interact with the database to use CRUD operations for managing blog posts using SQLAlchemy.
- Used the WTForms library for data validation with SQLAlchemy custom class to get and push data to the database.

PermaList

- Built using Node.js and PostgreSQL in the backend with Bootstrap5 for styling with ejs templating language.
- Used express for routing along with body-parser module to create middleware to parse requests.
- Implemented the database using PostgreSQL using the pg package.

Secrets WebApp

- Built multiple websites to implement user authentication.
- Strategies include basic authentication e.g. username and password stored in plain text in the database.
- Implemented bcrypt password hashing (blowfish based algorithm) for storing user passwords more securely in the database aligning better with OWASP best practices.
- Added a 10 round password salting process to protect user passwords from rainbow tables and hash collisions.
- Created OAuth 2.0 authentication strategy with google APIs allowing users to sign in and have credentials verified through Google.

LANGUAGES/FRAMEWORKS

- Python
- Flask
- CSS
- Javascript
- ReactJS
- HTML
- Java
- Node.js
- Bootstrap5
- Swift
- Express.js
- JQuery
- C#
- SQL
- Git

WORK EXPERIENCE

Jun '24 - Current

Goodsflow CoWorker | IKEA

Live Oak, Texas

- Member of safety forum which met monthly to discuss and implement safety strategies.
- Managed RDT Mobile devices conducting weekly audits and submitting IT tickets for fellow coworkers.
- Optimized loadout process by automating Excel sheet manifest for quicker and reduced errors when entering information.

Jan '21 - Mar '24

Machine Operator | Bay Valley Foods

San Antonio, Texas

- Improved sanitizing process leading to lower downtime and increase production.
- Led a small team of machine operators to increase efficiency in production process.
- Worked with upper management to express team concerns and find solutions for an efficient and safe production environment.

Jul '19 - Jan '21

Automotive Tech | Universal Toyota

San Antonio, Texas

- Increased store sales by recommending goods and services for customer vehicles.
- Worked with service advisors to express concerns about customer vehicles and need for repairs.
- Implemented a training program to help new Automotive techs to work safely with power tools and double checking work before delivery.

CERTIFICATIONS

- CompTIA Security+
- CompTIA Network+
