

# CHRIS SUNIL DSILVA

[dsilva.s.chris@gmail.com](mailto:dsilva.s.chris@gmail.com) | 551-344-8220 | [LinkedIn](#)

## EDUCATION

**Pace University, Seidenberg School of Computer Science and Information Systems**

**New York, NY**

Master of Science (MS) in Information Systems | **Concentration:** Information Security | **GPA:** 3.6

May 2024

## RELEVANT COURSEWORK

Information Security | Database Management Systems | Computer Networks

## TECHNICAL SKILLS & CERTIFICATIONS

**Programming Languages:** SQL, HTML, Python, R | **Database Management:** MySQL, Microsoft Access, Excel, Postgres SQL, MongoDB

**Network Security & Security Management:** Cisco ASA, Compliance Standards (ISO 27001, NIST Cybersecurity Framework)

**Ethical Hacking & Penetration Testing:** Cisco Packet Tracer, Nmap, Wireshark, Metasploit, Ophcrack, TrueCrypt, PhishMe, Burp Suite, John the Ripper Information Systems Auditing, Controls, & Assurance, Data Encryption | **AI Tools:** ChatGPT, Microsoft Copilot

**Software & Tools:** RStudio, VsCode, Google Collab | **Cloud/DevOps:** Docker, AWS Data Encryption, Oracle VM, VMware

**Operating Systems:** Windows, Ubuntu, Linux, MAC OS, ChromeOS | **Certifications:** TryHackMe Cyber Defense Certificate (2023)

## PROFESSIONAL EXPERIENCE

**Sanctuary For Families, New York, NY** | Jr. IT & Cybersecurity Specialist

June 2023 – Present

- Install, configure, and maintain security infrastructure for 2k+ employees across 6 branches, resolving technical issues and generate reports on system performance and security incidents using the Freshservice ticketing system and Okta.
- Collaborate with stakeholders to review and update documentation, effectively plan, organize, and track critical projects such as the remote desktop MFA rollout and DMARC implementation using Asana.
- Assist in the setup and configuration of new IoT devices, ensuring seamless integration into the network using Microsoft Intune.
- Monitor, configure, and maintain firewall logs, trusted IP addresses, and session activities using RDP Guard; manage servers through Remote Server Administration Tools (RSAT).
- Manage and monitor user account creation & access permissions using Active Directory & Azure ad connect, tailoring access policies using Admin account to maintain compliance for information security protocols using Powershell.

**ANZ, Cyber Security Management Virtual Experience Program, The Forage, Micro Intern**

March 2023

- Investigated company emails, assessing content & reporting suspicious items using PhishMe & Cisco ASA firewall software, analyzing Packet Capture file using Wireshark to identify & investigate potential threats.

**AIG, Shields Up Cybersecurity Virtual Work Simulation, The Forage, Micro Intern**

December 2022

- Responded to zero-day vulnerability, assessing impact & developing strategies to mitigate system risks, drafting client measures to resolve aftermath of cyber-attacks; performed brute force attack using Python to obtain passwords & encrypt files.

**SAP, Cybersecurity Engineering Virtual Work Simulation, The Forage, Micro Intern**

October 2022

- Identified security flaws including password issues for SAP client through Oracle Virtual Machine, identifying phishing attempts & presenting risk mitigation strategies, analyzing client's system security compliance to avoid future attacks.

## ACADEMIC PROJECTS & LABS

**Cybersecurity in Air Traffic Control (ATC) systems, Research Project**

January 2024 – April 2024

- Conducted in-depth research on cybersecurity vulnerabilities and threats specific to ATC systems, analyzed attack vectors, encryption protocols, and intrusion detection mechanisms.

**TryHackMe Cyber Defense Certification Lab**

March 2023

- Identified, analyzed, & mitigated security risks across complex IT environments, performing vulnerability scanning & penetration testing using Nessus, Metasploit, & Nmap, ensuring adherence with ISO 27001 & NIST Cybersecurity Framework.

**Skin Disease Prediction**

August 2019 - April 2020

- Created web application using HTML & JavaScript to code frontend, deploying AI-based Convolutional Neural Network (CNN) to predict skin diseases amongst rural populations to support dermatologist outreach.
- Developed database using Postgres SQL in MongoDB, collecting data & managing activity information using Salesforce CRM software.
