PROFESSIONAL SUMMARY

Java Full Stack Developer with 6+ years of experience developing enterprise applications using Core Java, JSP, Servlets, Struts, Spring MVC, Spring Boot, React, PostgreSQL, and Oracle. Skilled in RESTful APIs, Spring Security, JWT authentication, role-based authorization, SQL optimization, document workflows, and production support. Experienced in modernizing legacy Java applications and building cloud-native and AI-enabled solutions with Spring Cloud, Spring AI, OpenAI, and MCP.

TECHNICAL SKILLS

Languages: Java, SQL, JavaScript

Backend: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST APIs, Microservices, JWT

Frontend: React.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Thymeleaf

Databases: PostgreSQL, Oracle, MySQL, Redis

Cloud: AWS (RDS, Elastic Beanstalk, CodeCommit), Docker, Kubernetes, Apache Kafka

Tools: Git, GitHub, Maven, Swagger/OpenAPI, Postman, IntelliJ IDEA

PROFESSIONAL EXPERIENCE

Graduate Accessibility Student Staff (DART)

Aug 2025 – May 2026

University of Illinois Springfield

Springfield, IL

- Designed and developed full-stack document accessibility applications using Java, Spring Boot, React.js, and PostgreSQL to streamline document remediation workflows.
- Developed secure RESTful APIs for document upload, assignment management, workflow tracking, and accessibility review using Spring Boot and Spring Data JPA.
- Implemented JWT-based authentication and role-based authorization using Spring Security to secure internal applications.
- Collaborated with faculty, accessibility specialists, and Agile teams while ensuring WCAG 2.1 and Section 508 compliance for digital accessibility.

Software Developer

Oct 2023 – Aug 2024

Tech Mahindra

Mumbai, India

- Developed secure backend modules for the Axis Bank Supply Chain Finance Management (SCFM) platform using Java, Spring Boot, Oracle, PostgreSQL, and Spring Security.
- Designed and developed scalable RESTful APIs supporting enterprise financial workflows and supplier onboarding processes.
- Implemented JWT-based authentication and role-based authorization using Spring Security to secure APIs.
- Integrated Apache Kafka for asynchronous event-driven communication, enabling reliable processing of financial transactions across distributed services.
- Optimized SQL queries and service-layer business logic, reducing API response time by approximately 30%.
- Worked with AWS services including Amazon RDS and participated in Docker-based application deployment and CI/CD activities.
- Collaborated with cross-functional Agile teams during sprint planning, code reviews, API testing, production support, and release deployments.

Java Developer

May 2021 – Sep 2023

Tikona Infinet Pvt. Ltd.

Mumbai, India

- Developed scalable Spring Boot microservices using Java, PostgreSQL, Spring Data JPA, and Hibernate.
- Designed and implemented RESTful APIs consumed by frontend applications and internal business services.
- Implemented Spring Security with JWT authentication to secure application endpoints and user access.
- Developed unit and integration test cases using JUnit 5 and Mockito to improve application quality and reduce regression defects.
- Containerized Spring Boot applications using Docker and deployed services in Kubernetes development environments.
- Optimized SQL queries, resolved production issues through root cause analysis, and collaborated with Agile teams to deliver high-quality software releases.

Java Developer

Crystal Tech

Jul 2019 – Apr 2021

Mumbai, India

- Developed enterprise web applications using Core Java, JSP, Servlets, Struts, Spring MVC, and MySQL.
- Built MVC components including controllers, business services, DAO layers, and JSP-based user interfaces.
- Implemented server-side validation, session management, SQL integration, and reusable web components following MVC architecture.
- Collaborated with senior developers during code reviews, testing, deployment, application maintenance, and production support activities.

PROJECTS

Booking Management System — Spring Boot, Spring Security, PostgreSQL, Stripe, OpenAPI

- Designed and developed a hotel booking platform supporting hotel search, room reservations, inventory management, guest management, and secure online payments using Spring Boot and PostgreSQL.
- Built RESTful APIs for hotels, rooms, bookings, inventory, users, and payments following layered architecture and Spring Data JPA best practices.
- Implemented JWT-based authentication and role-based authorization using Spring Security to secure application endpoints.
- Integrated Stripe Payment Gateway with webhook support to process and verify booking transactions securely.
- Documented REST APIs using Swagger/OpenAPI, enabling simplified API testing and developer onboarding.

AI Text-to-SQL Guardrails — Spring Boot, Spring AI, Spring Security, PostgreSQL, JSqlParser

- Built an AI-powered application that converts natural language questions into executable SQL queries using Spring AI.
- Integrated JSqlParser to validate AI-generated SQL before execution and prevent malformed queries.
- Implemented SQL guardrails restricting execution to single SELECT statements while blocking unsafe operations such as INSERT, UPDATE, DELETE, and DROP.
- Maintained audit logs for approved and rejected SQL queries to improve traceability and debugging.
- Designed prompt engineering rules to improve SQL generation accuracy while enforcing database security constraints.

Restaurant POS & Management System — Java, Spring Boot, Spring Data JPA, PostgreSQL

- Developed a restaurant Point-of-Sale and management application supporting waiter, chef, cashier, manager, owner, host, and administrator workflows.
- Implemented role-based access control to provide secure functionality across multiple user roles.
- Designed RESTful APIs for employee, customer, order, menu, and inventory management using Spring Boot and Spring Data JPA.
- Integrated PostgreSQL for persistent data storage and SMTP email notifications for operational workflows.
- Built responsive server-side web pages using Thymeleaf, HTML, CSS, and JavaScript for daily restaurant operations.

EDUCATION

University of Illinois Springfield

Master of Science in Computer Science

May 2026

Springfield, IL

University of Mumbai

Bachelor of Engineering in Computer Engineering

June 2019

Mumbai, India

CERTIFICATION

- AWS Certified Cloud Practitioner (CLF-C02)
