SUMMARY

Diligent and results-oriented Data Engineer with 4+ years of professional experience and an M.S. in Computer Science. Proficient in Python, SQL, and PySpark, and intermediate in Java and Scala. Extensive experience with cloud technologies including Azure Data Factory, Azure Data Pipelines, Databricks Workflows, and Power BI. Skilled in building scalable data engineering solutions, optimizing ETL pipelines, and delivering actionable insights.

TECHNICAL SKILLS

- **Languages:** Python, SQL, PySpark, NoSQL, Scala, Unix Shell Scripts, Java
- **Data Technologies:** Spark, Databricks, Snowflake, Docker, Kubernetes
- **Azure Technologies:** Azure Data Factory, Data Pipelines, Databricks, Azure Synapse Analytics, Azure Kubernetes Service, SSIS, SSRS, dbt
- **AWS Technologies:** Lambda, Glue, EMR, Redshift, S3, DynamoDB, API Gateway, IAM
- **Databases:** PostgreSQL, MongoDB, SQL Server
- **CI/CD Tools:** Git, GitHub, Azure DevOps, JIRA
- **Business Intelligence Tools:** Power BI

PROFESSIONAL EXPERIENCE

Data Engineer, Akhil Software Corp, Ashburn, VA

Aug 2023 - Present

Project: Data Modernization

Role: Data Engineer

Client: ReAlign Insurance Holdings Inc.

Dec 2023 – Present

- Created Databricks notebooks and Delta Tables following Lakehouse architecture for data ingestion and reporting.
- Ingested and transformed disparate data sources (CSV, JSON, parquet) into Data Lake and Snowflake using Databricks ETL processes.
- Developed Spark-based ETL patterns using Python and Scala for large datasets (1TB+).
- Orchestrated data pipelines using Azure Data Factory and Databricks notebooks for PostgreSQL and MySQL data.
- Created CI/CD pipelines using Azure DevOps and Shell Scripts for seamless deployments.
- Collaborated with data scientists on machine learning data requirements and solutions.
- Implemented security using Azure Key Vault.

Project: Digital Campaign Management

Role: Data Engineer

Client: Audigent

Aug 2023 – Dec 2023

- Engineered advertising data solutions integrating REST APIs for campaign measurement.
- Developed data ingestion frameworks using PySpark on AWS Glue.
- Built ETL processes with Athena, Lambda, and PostgreSQL, transforming data with dbt.
- Migrated storage and query engines from AWS (Athena, S3) to Azure Synapse Analytics.
- Orchestrated pipelines using AWS MWAA Airflow and Lambda.

Tata Consultancy Services (TCS), Bangalore, India

Dec 2019 – Dec 2022

Data Engineer – Raymond James

Sept 2022 – Dec 2022

- Developed real-time data pipelines using Azure Synapse Analytics and Event Hubs.
- Implemented transformations with PySpark and Synapse Analytics for streaming data.

Data Engineer - Becton Dickinson

Aug 2020 - Aug 2022

- Built scalable data pipelines using Azure Data Factory and Databricks.
- Developed complex ETL solutions with Spark, SQL, and Python.
- Created interactive Power BI dashboards for business insights.

Junior Data Engineer - BHP

Dec 2019 - July 2020

- Developed foundational ETL pipelines for Azure Data Warehouse.
- Implemented distributed data processing using Python in Spark and HDInsight.

Education

Master's in Computer Science
University of Central Missouri

CERTIFICATIONS

[AWS Data Engineer Associate, AWS](#)

[SnowPro Core Certification, Snowflake](#)

[Data Engineer Associate, Databricks](#)
