SUMMARY

Data Analyst with 4 years of experience across consulting and healthcare analytics, using SQL, Python, Power BI, Tableau, and cloud platforms including AWS and Azure. Strong background in data modeling, ETL pipeline development, and large-scale data processing using PySpark and Snowflake. Hands-on experience with machine learning, NLP, and healthcare data standards (FHIR, HL7). Delivered audit analytics, risk insights, and predictive models by collaborating with cross-functional teams including business, engineering, and clinical stakeholders. Focus on data quality, governance, and building dependable, production-ready data solutions.

WORK EXPERIENCE

AI Data Analyst | Molina Healthcare | TX, USA

July 2025 – Present

- Orchestrated end-to-end development of predictive risk models using Python, TensorFlow, and AWS SageMaker on EHR and claims data (FHIR, HL7), improving early patient risk identification workflows across 3 care programs.
- Engineered scalable data pipelines with PySpark, Snowflake, and Apache Airflow to process 20M+ healthcare records monthly, reducing data processing time to 2 hours per cycle.
- Leveraged advanced SQL and feature engineering techniques to build high-quality training datasets, enabling deployment of 6 production-grade ML models for care management optimization.
- Spearheaded NLP-based analysis of clinical notes using Stanza and BERT models, extracting 50+ structured features that enhanced care gap detection across varied provider networks.
- Optimized model deployment and monitoring using AWS Lambda and CI/CD pipelines, automating retraining workflows and saving 12 hours/week in manual intervention.
- Collaborated across departments alongside clinicians, product managers, and data engineers to translate business requirements into analytical solutions, delivering 10+ data-driven insights adopted in operational decision-making.
- Strengthened data governance and compliance by implementing HIPAA-aligned data validation and audit frameworks, reducing data inconsistencies across 5 critical reporting systems.

Data Analyst | KPMG | India

July 2020 – July 2023

- Architected enterprise-scale data models using SQL, Azure Synapse, and Power BI to support financial audit analytics, accelerating reporting cycles to 3 days across 4 audit engagements.
- Deployed automated ETL workflows using Python, Alteryx, and Azure Data Factory to ingest and transform 10M+ transactional records, eliminating 15 hours/week of manual reconciliation effort.
- Synthesized complex financial datasets using advanced Excel (Power Query, VBA) and SQL joins to uncover anomalies in ledger transactions, identifying \$120,000 in potential compliance gaps.
- Modernized reporting solutions using Tableau and DAX-driven Power BI reports, delivering 12+ executive dashboards for real-time KPI monitoring across client portfolios.
- Instituted data quality frameworks leveraging Great Expectations and SQL validation rules, improving audit data reliability across 6 reporting systems.
- Evaluated large-scale datasets to support risk advisory and forensic analytics engagements, applying statistical techniques and regression modeling to identify fraud indicators and control weaknesses.
- Partnered with auditors, risk consultants, and client stakeholders to translate regulatory requirements into data-driven solutions, coordinating with 5 cross-functional teams on audit deliverables.
- Guided junior analysts on data wrangling, visualization standards, and SQL optimization best practices, improving team delivery consistency across 3 concurrent client projects.

TECHNICAL SKILLS

- Programming & Scripting:** Python, SQL, R, Scala, PySpark, Java, Shell Scripting, Jupyter Notebook
- Data Analysis & Analytics:** Data Analysis, Data Mining, Data Profiling, Statistical Analysis, Exploratory Data Analysis (EDA), Data Validation, Data Cleansing, Root Cause Analysis, Trend Analysis, Predictive Analytics, Descriptive Analytics, Diagnostic Analytics
- AI & Machine Learning:** Machine Learning, Deep Learning, Generative AI, Large Language Models (LLMs), Natural Language Processing (NLP), Computer Vision, Predictive Modeling, Supervised Learning, Unsupervised Learning, Reinforcement Learning, Model Training, Model Evaluation, Model Deployment, MLOps, Prompt Engineering, Retrieval-Augmented Generation (RAG)
- Data Engineering & ETL/ELT:** ETL Development, ELT Pipelines, Data Integration, Data Transformation, Data Migration, Data Ingestion, Data Processing, Batch Processing, Real-Time Data Processing, Data Orchestration, Workflow Automation, Data Pipeline Development
- Big Data Technologies:** Apache Spark, PySpark, Hadoop, HDFS, Apache Hive, Apache Kafka, Apache Airflow, Databricks, Apache NiFi
- Databases & Data Warehousing:** SQL Server, MySQL, PostgreSQL, Oracle, MongoDB, Snowflake, Amazon Redshift, Google BigQuery, Azure Synapse Analytics, Data Warehousing, Data Modeling, Dimensional Modeling, Star Schema, Snowflake Schema
- Cloud Platforms:** AWS S3, Glue, Lambda, Redshift, Azure Data Factory, Azure Databricks, Data Lake, Google Cloud Storage, BigQuery
- Business Intelligence & Visualization:** Power BI, Tableau, Looker, Microsoft Excel, Google Data Studio, SSRS, Dashboard Development, KPI Reporting, Data Visualization, Interactive Reporting, Executive Reporting
- AI/ML Frameworks & Libraries:** TensorFlow, PyTorch, Keras, Pandas, NumPy, Matplotlib, OpenAI APIs, LangChain, MLflow
- Data Governance & Quality:** Data Governance, Data Quality Management, Master Data Management (MDM), Data Lineage, Data Cataloging, Data Compliance, Metadata Management, Data Security, Data Auditing
- DevOps & Version Control:** Git, GitHub, GitLab, Bitbucket, CI/CD Pipelines, Docker, Kubernetes, Jenkins, Terraform
- Methodologies:** Agile, Scrum, Kanban, SDLC, Data Lifecycle Management, CRISP-DM, Waterfall

EDUCATION

University of North Texas | M.S. in Information Systems & Technology | Denton, TX

August 2023 – May 2025

CERTIFICATIONS

- Google Data Analytics Professional Certificate
- Microsoft Certified: Power BI Data Analyst Associate
