

Malathi Gaddala

TX, USA | +1 (408) 650-2429 | [linkedin.com/in/malathi-gaddala-542a62325](https://www.linkedin.com/in/malathi-gaddala-542a62325)

PROFESSIONAL PROFILE

Data Analyst and emerging Data Scientist with hands-on experience in Python, SQL, Power BI, and machine learning. Proven track record in data cleaning, exploratory analysis, and predictive modeling across aviation, finance, and academic domains. Recognized for academic excellence and project leadership, with a focus on delivering actionable insights from complex datasets.

CORE COMPETENCIES

Data Collection & Cleaning | Exploratory Data Analysis | Statistical Analysis | Predictive Modeling & Machine Learning | Data Pipeline Automation | Database Design & ER Modeling | Data Visualization | Reporting & Dashboarding

TECHNICAL SKILLS

Python | SQL | Tableau | Power BI | Spreadsheets (Excel) | Machine Learning (Scikit-learn) | Git | Database Design | ER Modeling

EDUCATION

Master of Science in Advanced Data Analytics GPA: 3.7

University of North Texas, Denton, TX 2024 – 2026

- Awardee: Best Final Project & Best Term Project Presentation

Bachelor of Science in Mathematics, Statistics and Computer Science GPA: 3.5

Kakatiya University, Telangana, India 2020 – 2023

- Cum Laude | President, The Mathlete Club | Hall of Fame, Statistical Analytics Club (SAC)

CERTIFICATIONS

Google Data Analytics Professional Certificate | Google

Python Pro Certificate | Udemy

Power BI Data Analyst | Microsoft Certified

EXPERIENCE

Lead Data Analyst, American Airlines Inc. Jan 2026 – May 2026 Remote

- Collaborated with AA management on their Flight Arrival Delay Prediction project, working with secured and private flight datasets.
- Built automated data cleaning pipelines to process large volumes of legacy and current flight data, improving data readiness for modeling.

Jr. Data Scientist (Internship), Corizo | Wipro Inc. Aug 2023 – Dec 2023 Remote

- Gained proficiency in data science methodologies and their applications across technology and business domains.
- Worked within an Exploratory Data Analysis team to analyze Market Trends Post-COVID, detecting patterns and anomalies.
- Achieved a 100% success rate on all preliminary and final deliverables.

Jr. Data Analyst, Kakatiya University 2022 – 2023 Telangana, India

- Contributed to the Micro-Finance Systems for Agriculture project, leading data collection and cleaning efforts.
- Assisted in the design and creation of a Bank Loans Systems database.

PROJECTS

Flight Arrival Delay Prediction – American Airlines Inc.

- Developed predictive models on secured airline data to forecast flight arrival delays, enabling proactive operational decision-making.
- Engineered automated pipelines for data cleaning and preprocessing of large-scale legacy and real-time flight records.

Online Recruiting System – Scope & ER Design, University of North Texas

- Defined project scope and deliverables for a university-wide online recruiting system.
- Assisted with database architecture design and delivered the final Entity-Relationship (ER) diagram.

Micro-Finance Systems for Agriculture – Kakatiya University

- Collected and cleaned rural micro-finance datasets, ensuring data quality for downstream analysis.
- Supported the design of a bank loan management database system for agricultural stakeholders.

LEADERSHIP, CAMPUS & COMMUNITY INVOLVEMENT

- President, The Mathlete Club – Kakatiya University: Led competitive mathematics initiatives and organized inter-university events.
- Hall of Fame, Statistical Analytics Club (SAC) – Kakatiya University: Recognized for outstanding contributions to the club.
- Essay Writing Winner, United Nations (2017) – Category 1: Awarded for excellence in academic writing at the UN essay competition.
