SUMMARY

A strategic Revenue Analytics & Insights Analyst with over 5 years of experience leveraging AI/ ML and data visualization to drive financial performance and optimize business operations. Proficient in advanced analytics, predictive modeling, and generative AI using Python, SQL, and modern cloud platforms. Proven ability to translate complex data into actionable insights for FP&A, forecast accuracy, and informed decision-making through compelling visualization tools and strong communication skills.

EXPERIENCE

Mir Home Care – Data Analyst | USA

July 2024 – Present

- Solved patient safety risks by building a clustering-based patient segmentation model, preventing 30+ critical incidents.
- Reduced patient wait times by applying time series forecasting (ARIMA, Prophet) for caregiver scheduling optimization.
- Improved service quality by developing a real-time anomaly detection system in Power BI integrated with SQL Server, enabling instant issue resolution.
- Automated manual reporting processes with Python + Tableau, reducing reporting time by 40%.

Lifetime Homecare Support – Data Analyst | USA

June 2023 – August 2023

- Solved patient care plan inefficiencies by designing ML models (Random Forest, XGBoost) with 93% accuracy, reducing service gaps by 40%.
- Reduced hospital readmissions by building a risk assessment model in Python + SQL with 92% accuracy.
- Improved medication management by implementing an inventory optimization algorithm (FEFO logic), reducing delays by 18%.

Quantum Consumer Solution – Data Analyst | Remote (Bangladesh)

Jan 2020 – Jan 2022

- Guided product launch strategies by analyzing consumer behavior using SQL + SPSS.
- Enhanced decision-making with interactive Power BI dashboards tracking brand perception across regions.
- Increased efficiency by 30% through Python/Excel automation of survey reporting.

CORE SKILLS

- **Programming & Analytics:** Python, SQL, Excel (Advanced), SPSS.
- **Time Series & Forecasting:** ARIMA, Prophet, Trend & Seasonality Analysis
- **Data Visualization & BI:** Power BI (DAX, Real-Time Dashboards), Tableau, KPI Reporting
- **Databases & Data Systems:** SQL Server, PostgreSQL, MySQL
- **Healthcare & Operations Analytics:** Patient Risk Modeling, Readmission Prediction, Care Plan Optimization, Scheduling Optimization
- **Machine Learning & Statistics:** Random Forest, XGBoost, Clustering, Classification, Regression, Model Evaluation

PROJECTS

- **BERT Sentiment Classifier** – Fine-tuned Hugging Face BERT on IMDB reviews, achieving 92% accuracy; deployed via FastAPI + Docker on AWS.
- **Healthcare Risk Prediction** – Built Random Forest & XGBoost models to predict hospital readmission risk with 93% accuracy, reducing re-admissions by 20%.
- **Generative AI Chatbot** – Implemented RAG pipeline with LangChain + OpenAI API + Pinecone, improving healthcare client support response time by 40%.
- **FinanceTracker (GitHub Project)** – Created a financial data tracking app for expense monitoring and KPI visualization with Python + SQL + Power BI.

EDUCATION

MBA In Business Analytics & Data Analytics – University of Findlay, OH

BBA In Finance And Accounting – United International university, Dhaka
