PROFESSIONAL SUMMARY

Data Analyst and AI/ML Engineer with M.S. in Data Analytics and 2 years of hands-on experience delivering production analytics solutions in a government environment. Built enterprise Power BI dashboards, automated Azure SQL and AWS data pipelines, and developed machine learning models including LSTM forecasting and CNN classification. Proficient in Python, SQL, Power BI, Azure, and AWS. Experienced working cross-functionally in Agile teams with technical and non-technical stakeholders. Open to Data Analyst, Business Analyst, Data Engineer, Data Scientist, ML Engineer, and AI/Software Engineer roles.

PROFESSIONAL EXPERIENCE

Illinois Department of Children and Family Services (DCFS)

Data Analyst

Springfield, IL

Feb 2025 - May 2026

- Designed and deployed 3 production Power BI dashboards with DAX measures, drill-through pages, and data models used daily by 5+ program managers monitoring 10,000+ child welfare records - reducing manual reporting time by 40%
- Built automated Azure SQL ETL pipelines using CTEs, window functions, and stored procedures to extract, transform, and load data from multiple enterprise source systems into centralized data models for executive reporting
- Applied statistical analysis and EDA on multi-year program datasets to identify service delivery trends and generate actionable insights directly informing senior leadership resource allocation decisions
- Delivered ISBE Head Start analytics platform - gathered KPI requirements from Illinois State Board of Education stakeholders and built end-to-end Power BI reporting solution deployed to production and distributed to external state partners
- Collaborated cross-functionally in Agile/Scrum sprints with program staff, QA, and IT teams - maintained technical documentation covering data architecture, transformation logic, and deployment procedures

Phoenix Global

Data Engineering Intern

Hyderabad, India

Apr 2023 - Jun 2023

- Built and deployed AWS cloud data pipelines (S3, Lambda, EC2, CloudWatch) for large-scale data ingestion and transformation - implemented multi-stage GitLab CI/CD pipeline reducing manual deployment steps by 60%
- Documented full system architecture and disaster recovery runbooks adopted by the engineering team - version-controlled all scripts with branch-based development and peer code reviews

InternForage - Startup

Full Stack Developer

Remote

Mar 2022 - Aug 2024

- Built and maintained full stack web applications - designed and optimized SQL database schemas, integrated REST APIs, and shipped features in an Agile distributed team environment across time zones

TECHNICAL SKILLS

Languages: Python (Pandas, NumPy, Scikit-learn, TensorFlow, Keras), SQL (T-SQL, CTEs, Window Functions, Stored Procedures), R, JavaScript
ML and AI: Regression, Classification, Random Forest, XGBoost, LSTM, CNN, ARIMA, Feature Engineering, Cross-Validation, SHAP, LLM Fine-Tuning (LoRA/PEFT), RAG, LangChain, Prompt Engineering

Data Engineering: ETL Pipelines, Azure SQL Database, Azure Synapse Analytics, AWS (S3, Lambda, EC2), Databricks, PySpark, Data Modeling, Data Versioning, MLflow

BI and Visualization: Power BI (DAX, Power Query, Data Modeling, RLS), Tableau, Matplotlib, Seaborn, Microsoft Excel

Tools and Methods: Git, GitLab CI/CD, GitHub, Docker, Agile/Scrum, JIRA, REST APIs, FastAPI, Statistical Analysis, A/B Testing, Hypothesis Testing

KEY PROJECTS

ISBE Head Start Power BI Platform (Power BI, Azure SQL, DAX, ETL): Built end-to-end enterprise BI solution deployed to production for Illinois State Board of Education - data models, DAX measures, and drill-through reports tracking enrollment, compliance, and service utilization distributed to external state partners.

LSTM Time Series Forecasting (Python, Keras, ARIMA): Built LSTM sequence model benchmarked against ARIMA and Holt-Winters baselines with uncertainty quantification - applicable to demand forecasting and business trend analysis.

Medical Imaging CNN Classifier (TensorFlow, Keras, SHAP): Built CNN achieving 89% accuracy on multi-class image classification with data augmentation - added SHAP explainability layer for interpretable model outputs.

End-to-End ML Pipeline (Python, AWS S3/Lambda, GitLab CI/CD): Deployed scalable data pipeline with full CI/CD automation and 60% reduction in manual deployment steps - mirrors production ML infrastructure patterns.

LLM LoRA Fine-Tuning Demo (HuggingFace PEFT, GPT-2): Fine-tuned GPT-2 with LoRA adapter - evaluated generalization on held-out tasks. Demonstrates applied GenAI and parameter-efficient fine-tuning knowledge.

EDUCATION AND CERTIFICATIONS

University of Illinois Springfield - M.S. Data Analytics

Coursework: Machine Learning, Deep Learning, Statistical Methods, Predictive Analytics, Big Data Analytics, Advanced Database Concepts, Operations Research, Data Visualization

Aug 2024 - May 2026

GITAM University - B.Tech Electronics and Communication Engineering (AI/ML)

Coursework: Neural Networks, Signal Processing, Embedded Systems, Mathematical Modeling, Probability and Statistics | Certifications: Neural Networks and Deep Learning - deeplearning.ai | Generative AI Fundamentals - Databricks | Pursuing: AI/ML Specialization

Aug 2020 - Jul 2024
