EDUCATION

State University of New York at Buffalo, School of Engineering and Applied Science

Buffalo, NY, USA

Master of Science in Data Science

December 2025

Relevant Coursework: Data Visualization, SQL, Statistical Learning, Probability, Data Computing.

University of Mumbai, A. P. Shah Institute of Technology

Thane, MH, India

Bachelor of Engineering in Computer Engineering

July 2024

Relevant Coursework: Probability & Statistics, Database Management Systems, Big Data Analytics.

TECHNICAL SKILLS AND CERTIFICATIONS

SQL: Joins, CTEs, window functions, aggregations

Programming: Python (Pandas, NumPy, scikit-learn), R

Data Analysis & Modeling: ETL, Data Wrangling, A/B Testing, Time Series Forecasting, Regression Analysis, Hypothesis Testing

Business Intelligence: Power BI (DAX), Tableau, AWS QuickSight, Excel (Power Query, Pivot Tables, VBA)

AI Tools: Generative AI, Prompt Engineering, Claude AI, ChatGPT, Power BI Copilot

Cloud & Tools: Azure, AWS (S3, Glue, Athena), Git, GitHub, REST APIs, JSON, Airflow

Certifications: Microsoft Certified: Power BI Data Analyst Associate (PL-300), AWS Certified Cloud Practitioner, Alteryx Designer Core

WORK EXPERIENCE

AllPeople Marketplace - Data Analyst | August 2025 - Present

San Luis Obispo, CA, USA

- Built an automated pricing analytics pipeline using Python, Prsync API, JSON normalization, PostgreSQL, SQL, and Airflow across **10K+ SKUs and 10+ categories, improving pricing consistency by 15% and contributing to \$50K+ incremental revenue.**
- Integrated competitor pricing APIs with Shopify sales data to build SKU-level datasets for revenue, margin %, and price-gap analysis.
- Designed Power BI dashboards with pricing heatmaps, competitor benchmarking, SKU performance tracking, and moving-average sales forecasting, **improving inventory allocation efficiency by 12%** and supporting leadership pricing decisions.
- Architected a star schema using DAX and RLS while automating ETL and Power BI workflows in Airflow, **reducing reporting time by 20%.**

ATMS Tech Solution Pvt Ltd - Data Analyst Intern | April 2022 - March 2023

Thane, MH, India

- Optimized financial datasets using Python with MySQL, achieving a **30% reduction in data retrieval time.**
- Cut weekly close reporting time by 20%** with Power BI dashboards adopted by Finance and Underwriting.
- Executed loan portfolio analysis and implemented AWS Glue ETL pipelines, **reducing overall processing time by 25%.**

AICTE - AI/ML Intern | July 2022 - September 2022

Thane, MH, India

- Extracted and engineered features from **70K+ telecom records** using SQL and Python, training **Logistic Regression and Random Forest** churn models achieving **86% accuracy and 0.90 ROC AUC.**
- Identified **5 key churn drivers** including contract type, tenure, and monthly charge using feature importance analysis and cohort segmentation.
- Developed a Power BI churn dashboard with five KPIs and risk segments, **improving retention by 11%** within one quarter.

PROJECTS

Amazon Sales Analytics Dashboard using Power BI & AI

May 2026

- Built an end-to-end Power BI analytics solution on **200K+ Amazon USA sales orders across 5 relational tables**, leveraging Claude AI for data profiling, Power Query transformations, and DAX development, **reducing dashboard development time by 35%.**
- Designed a star schema model with **60+ DAX measures** and interactive dashboards to analyze **\$20M+ revenue trends**, seasonal demand, customer behavior, high-margin products, and time-series sales forecasting using rolling averages and trend analysis.
- Automated KPI and time-intelligence reporting in Power BI, **improving reporting efficiency by 40%** and accelerating sales decisions.

Financial Market Risk Analytics

January 2026

- Scraped S&P-100 tickers from Wikipedia and ingested **5+ years of daily stock market data (120k records)** using Python and **Yahoo Finance API**, storing the dataset in **AWS S3** and cataloging with **AWS Glue.**
- Implemented SQL analytics in **Athena**, identifying Top 20 volatile stocks and a **Tech-Energy correlation of -0.3.**
- Engineered interactive **QuickSight** dashboards to track volatility trends and sector dynamics, with a daily refresh pipeline, enabling a simulated **5-8% reduction** in portfolio risk through sector rebalancing insights.

Loan Eligibility Prediction

December 2025

- Cut manual approvals by 30%** by developing a supervised ML model (scikit-learn) for loan eligibility, combining EDA with classification to accelerate lending decisions while ensuring compliance with risk policies.
- Executed a robust preprocessing pipeline on **10K+ loan records**, including wrangling, imputation, categorical encoding, feature engineering, scaling, and outlier handling, to raise model accuracy and ensure clean, reliable training data.
- Trained and **tuned Naive Bayes**, baselines in **scikit-learn**, achieving **83% accuracy** for reliable loan assessments.

BlinkIT Grocery Sales Dashboard using Excel

August 2025

- Created an Excel dashboard with pivots and charts analyzing **8.5K+ SKUs and \$1.2M sales** to identify inventory and pricing gap.
- Evaluated outlet performance with **Excel (VLOOKUP, SUMIFS)**, revealing **Tier 2 stores drove 78% of revenue (\$935K+)** and enabling prioritization of distribution and improvement in channel strategy.
- Segmented products by type and fat content, identifying fruits and snacks as growth drivers and **driving 12% revenue growth.**
