PROFESSIONAL SUMMARY

Data Engineer with 2+ years of experience building scalable ETL/ELT pipelines, cloud-based analytics solutions, and reporting platforms using SQL, Python, PySpark, Microsoft Fabric, Azure Data Factory, and Power BI. Experienced in data modeling, data quality validation, cloud data ecosystems, AI/ML-enabled analytics, and transforming large datasets into reliable business insights. Skilled in pipeline optimization, data governance, metadata-driven workflows, documentation, and cross-functional collaboration.

TECHNICAL SKILLS

Programming & Query Languages: SQL, Python, Spark SQL, PySpark, Java, TypeScript

Data Engineering & ETL/ELT: ETL Pipelines, ELT Workflows, Data Ingestion, Data Transformation, Data Modeling, Batch Processing, Microsoft Fabric, Azure Data Factory, Azure Synapse Analytics, Azure Databricks

Cloud Data Platforms: Azure, AWS Concepts, Lakehouse Architecture, Cloud Analytics Platforms

Databases & Warehousing: Azure SQL Database, Azure PostgreSQL, MySQL, MongoDB, Data Warehousing

Analytics & Visualization: Power BI, Tableau, KPI Dashboards, Reporting Analytics, Business Intelligence

Data Quality & Governance: Data Validation, Data Quality Monitoring, Metadata Management, Data Lineage, Root Cause Analysis

DevOps & Collaboration: Git, GitHub, Azure DevOps, CI/CD Pipelines, Docker, Documentation, Code Reviews, Agile

PROFESSIONAL EXPERIENCE

Open Source with SLU

Data Engineer

Saint Louis, Missouri

May 2025 – May 2026

- Designed and maintained scalable ETL/ELT pipelines using SQL, Python, Microsoft Fabric, PySpark, and Spark SQL to support operational analytics across multiple shelter locations.
- Built cloud-based data workflows integrating MongoDB, REST APIs, and Azure Data Factory, reducing manual data processing effort by 40%.
- Developed Power BI reporting datasets and KPI dashboards supporting operational planning, service coverage analysis, and business decision-making.
- Implemented data quality validation, monitoring controls, and governance practices that improved reporting accuracy by 30%.
- Optimized SQL queries and Spark-based transformations, reducing processing time by 35% and improving dashboard refresh performance.
- Collaborated with analysts, stakeholders, and engineers to deliver scalable data products, documentation, testing support, and production deployments.

Deloitte Consulting

Data Analyst

Hyderabad, Telangana

Jul 2023 – Jul 2024

- Analyzed healthcare workforce datasets using SQL, Python, Excel, and Power BI, improving scheduling efficiency by 25% through KPI monitoring and reporting automation.
- Developed SQL-based transformation workflows and reporting solutions supporting workforce analytics and operational decision-making.
- Performed data validation, UAT testing, reconciliation, and root-cause analysis, reducing reporting discrepancies by 20%.
- Built reusable reporting datasets and dashboards that improved reporting consistency and reduced manual effort across business teams.
- Collaborated with business stakeholders to document requirements, explain technical findings, and deliver actionable analytics recommendations.

DATA ENGINEERING PROJECTS

CampusBytes – Campus Communication Platform <i>Java, Spring Boot, React.js, PostgreSQL, Docker, GitHub Actions</i> - Developed a full-stack campus communication platform supporting user profiles, organizations, event workflows, and campus engagement features. - Built REST APIs using Spring Boot and PostgreSQL for authentication, content management, and event operations. - Implemented CI/CD pipelines using GitHub Actions and deployed services through Docker-based workflows. - Integrated Gemini AI-powered content generation to automate post creation and improve user engagement workflows.	Jan 2025 – May 2025
End-to-End Machine Learning Pipeline for Warfarin Dose Prediction <i>Python, SQL, Scikit-learn, XGBoost</i> - Developed a machine learning pipeline processing 5,700+ patient records for predictive healthcare analytics. - Performed data extraction, cleansing, transformation, feature engineering, and validation using Python and SQL. - Evaluated Random Forest, XGBoost, SVR, and Neural Network models using MAE, RMSE, and R² metrics.	Jan 2025 – May 2025

EDUCATION

Saint Louis University <i>Master of Science in Computer Science CGPA: 3.8/4.0</i>	Missouri, United States Aug 2024 – May 2026
G. Narayanamma Institute of Technology and Science <i>Bachelor of Technology in Electrical and Electronics Engineering CGPA: 8.92/10</i>	Hyderabad, India Aug 2019 – Jun 2023

CERTIFICATIONS

- HackerRank Problem Solving - HackerRank Python - Raise Digital Web Development
