SUMMARY

Data Engineer with 5+ years of experience building scalable data pipelines and real-time data processing systems across AWS, Azure, and GCP. Specialized in PySpark, Databricks, Kafka, and SQL, with a strong focus on optimizing ETL workflows, improving data latency, and designing cloud-based data platforms. Proven ability to deliver high-performance data solutions supporting large-scale analytics and business-critical systems.

TECHNICAL SKILLS

- **Programming & Scripting:** Python, SQL, PL/SQL, Shell Scripting
- **Big Data & Processing:** Apache Spark, PySpark, Kafka, Hadoop (HDFS, Hive, HBase, Sqoop), Airflow
- **Cloud Platforms:**
 - AWS (S3, EMR, Redshift, Lambda, Glue, Athena, Kinesis)
 - Azure (Data Factory, Databricks, Azure Data Lake, Azure SQL)
 - GCP (BigQuery, Dataflow, Dataproc, Cloud Storage)
- **Databases & Warehousing:** Snowflake, PostgreSQL, MySQL, Oracle, SQL Server, MongoDB, Cassandra
- **ETL & Data Integration:** Azure Data Factory, SSIS, Talend, Informatica
- **DevOps & Tools:** Docker, Kubernetes, Jenkins, Terraform, Git
- **Visualization & BI:** Tableau, Power BI
- **Other:** REST APIs, Linux/Unix

RELEVANT EXPERIENCE

DuPont

Wilmington, Delaware, USA

October 2025 – Present

Azure Data Engineer

- Designed and implemented scalable **ETL pipelines using PySpark and Azure Databricks**, enabling efficient processing of large-scale datasets.
- Built end-to-end **data ingestion pipelines using Azure Data Factory**, improving data availability and accessibility for analytics teams.
- Developed **real-time streaming pipelines using Kafka and Spark Streaming**, enabling near real-time data processing and insights.
- Optimized Spark jobs (parallelism, memory tuning), reducing **processing latency by 15%** and improving performance.
- Designed **data models and schema structures in Snowflake**, supporting analytics and reporting use cases.
- Implemented **CI/CD pipelines using Jenkins and Docker**, improving deployment efficiency and release consistency.
- Managed containerized workloads using **Kubernetes**, ensuring scalability and secure deployments.
- Built monitoring solutions using **Elasticsearch and Kibana**, improving system observability and issue detection.

21st Century Insurance

Wilmington, Delaware, USA

September 2023 - September 2024

AWS Data Engineer

- Designed and developed scalable **ETL pipelines using Apache Spark (Python/Scala)** for large-scale data processing.

- Built **real-time data ingestion pipelines using Kafka and REST APIs**, enabling continuous streaming into distributed systems.
- Developed serverless workflows using **AWS Lambda, Step Functions, and CloudWatch**, reducing manual effort by **20%**.
- Optimized **SQL queries and data transformations**, improving query performance and data retrieval efficiency.
- Engineered data storage solutions using **Hive and HBase**, leveraging partitioning and compression techniques.
- Migrated legacy systems to AWS using **Terraform and EC2**, improving scalability and reliability.
- Implemented **Docker and Kubernetes-based data workflows**, ensuring consistent and scalable deployments.
- Built CI/CD pipelines using **Jenkins**, reducing release cycles and improving deployment reliability.

Tata Consultancy Services

Hyderabad, India

April 2021 - August 2023

GCP Data Engineer

- Designed and developed scalable **ETL pipelines using PySpark and Dataproc**, processing **100+ GB of data daily**.
- Built data workflows using **Apache Beam and Dataflow** for reliable batch and streaming processing.
- Optimized **BigQuery SQL queries**, improving performance by **25–35%** through partitioning and query tuning.
- Implemented orchestration using **Apache Airflow (Cloud Composer)**, automating end-to-end data pipelines.
- Ingested and transformed data into **GCS and BigQuery** using Spark and Sqoop.
- Developed **data validation frameworks using SQL/PLSQL**, ensuring high data quality and consistency.
- Created secure data access solutions using **BigQuery authorized views**.
- Built dashboards using **Power BI and Data Studio**, supporting reporting and business insights.

F9 Info Technologies,

Visakhapatnam, India

May 2019 – March 2021

Data Analyst

- Performed **data collection, cleaning, and validation** across multiple sources, ensuring high data accuracy and reliability.
- Conducted **exploratory data analysis (EDA)** to identify trends and support data-driven decision-making.
- Developed **Excel dashboards and reports** (Pivot Tables, VLOOKUP), reducing manual reporting effort by **8%**.
- Wrote **basic SQL queries** to extract and analyze data from relational databases.
- Collaborated with cross-functional teams to gather requirements and deliver actionable insights.
- Supported **ERP implementation** by validating data migration and documenting business requirements.
- Generated regular reports for leadership, improving visibility into operational performance.
- Maintained data documentation and workflows, ensuring consistency and governance.

EDUCATION

Master of Science in Data Science (2025)

Rowan University, New Jersey, USA

Bachelor of Technology in Electronics and Communication Engineering (2019)

Gitam University, Andhra Pradesh, INDIA
