Education

Northeastern University, Boston, Massachusetts

Bachelor of Science in Industrial Engineering, Minor in Mathematics

Courses: Capstone Design; Logistics & Supply Chain Management, Stochastic Modeling, Simulation Modeling & Analysis, Operations Research, Lean Concepts & Applications, Database Systems, Engineering Economy, Manufacturing Systems

Study Abroad: McGill University, Montreal, Quebec

Professional Experience

Quality Assurance Engineer, Bain Capital, Boston, Massachusetts

July 2023 - January 2025

- Partnered with cross-functional stakeholders across Infrastructure, Security, and Desktop Engineering to gather and clarify requirements, ensuring alignment on project scope and overall business needs
- Translated complex data analysis and testing results into clear, visual presentations for non-technical stakeholders, highlighting root causes and actionable insights to support business decisions
- Designed and implemented key metrics to measure success, enabling stakeholders to track progress and make decisions
- Documented technical issues, resolutions, and updates in Salesforce to support stakeholder visibility
- Led User Acceptance Testing (UAT) with business partners to validate features, document results, and secure sign-off
- Developed automated test scripts in Leapwork and Selenium to improve efficiency, sharing results with leadership
- Managed CMDB change tickets in ServiceNow to maintain accurate tracking and communicate updates to teams
- Participated in Agile ceremonies to align QA and operational priorities with organizational goals

Product Intern, HqO Inc., Boston, Massachusetts

September - December 2022

- Partnered with the key integrations team to onboard customers onto the platform through a streamlined, scalable process
- Implemented Salesforce Service Cloud automations to streamline processes and improve CRM consistency
- Led onboarding calls with merchants to walk through supplier implementation, ensuring alignment across stakeholders
- Supported PMs by configuring applications, performing integration testing and submitting detailed bug reports
- Performed routine audits of Salesforce customizations to ensure accurate client data tracking across teams
- Collected and synthesized customer feedback using Delighted, informing improvements to the implementation
- Created Jira tickets via API integrations for error logs identified in DataDog, enabling faster resolution
- Contributed to product iteration cycles in an Agile environment, ensuring customer needs were reflected

Quality Assurance Intern, Bain Capital, Boston, Massachusetts

January - June 2022

- Assisted team in managing Test Backlog for IT by taking direction and priorities from technical teams
- Evaluated change management metrics by testing statistics to confirm documentation is completed and approved
- Developed and maintained platform that tracks QA Projects status via Smartsheet
- Supported in documentation efforts and data entry by updating testing documentation in Quality Center

Research Intern, AIRINC, Cambridge, Massachusetts

January- June 2021

- Conducted research using sources such as PricewaterhouseCoopers (PwC), Deloitte, Ernst & Young (EY) and KPMG to update and maintain tax algorithms for all AIRINC supported tax jurisdictions
- Cooperated with the dev team to apply updates on country's tax file using SQL queries and writing stored procedures
- Maintained and organized internal tax research database via Airlookup and Microsoft Excel
- Assisted team in completing client-specific consulting projects and customized assignment cost projections

Academic Project

Capstone Design Project, Northeastern University, Boston, Massachusetts

September 2022 - May 2023

- Analyzed the Boston Health Violation database to identify trends in health code breaches, creating visualizations in Tableau to provide actionable insights for restaurant management
- Scraped reviews from Yelp.com using Python and BeautifulSoup, performing text analysis to complement violation data and reveal patterns impacting restaurant health standards
