Summary

Curious and motivated Software Engineer with 2+ years of experience building web platforms, optimizing system performance, I enjoy writing clean, efficient code and learning new tools along the way. Looking for a place where I can grow, contribute, and make technology a little smarter (and friendlier) every day. Open to relocating and willing to put in extra effort to self-train myself on required stacks.

Experience

Software Developer (IT & Web Systems)

Jan 2023 – June 2025

Office of International Education, University at Buffalo

- Maintained University's International Education CMS website using HTML, CSS, JavaScript, PHP, and SQL.
- Integrated front-end with REST APIs and backend apps to improve site reliability.
- Automated staff reporting and data extraction with Python scripts, boosting workflow efficiency.
- Strengthened site functionality through testing and debugging, ensuring smooth user experience.

Systems Performance Analyst

Jan 2024 – Dec 2024

CPI-NS Lab, University at Buffalo

- Designed Python tools for benchmarking multi-node DBs and analyzing latency/throughput.
- Collaborated on distributed systems research, implementing components in Go and C++ in Linux+Bash env.
- Improved query performance by 10% through code optimization and error recovery mechanisms.
- Worked in a team-based Agile environment, contributing to experiments and peer reviews.

Teaching Assistant - Distributed Systems

Jan 2023 – May 2023

Department of Computer Science, University at Buffalo

- Led lab sessions covering fundamental concepts in distributed computing and system design.
- Designed Scala/Java assignments to help 50+ students grasp distributed algorithms.
- Reviewed student code and guided debugging using Linux VM and bash scripting.

Software Development Intern

May 2022 – Sep 2022

Kyros Infotech, India

- Developed REST APIs with Java Spring Boot and integrated with MySQL databases.
- Built responsive React.js front-end features with dynamic API integration.
- Supported CI/CD setup using Docker and GitHub Actions, enabling faster deployments.
- Participated in Agile sprints, code reviews, and testing with senior engineers.

Projects

Lost and Found Portal

🐙 GitHub 📁 Figma 🌐 Deployed Website

- Build a SaaS-style web app from scratch for posting, searching, and managing lost items.
- Built a responsive React.js, XML frontend and PHP backend with MySQL integration.
- Implemented user authentication, image uploads, advanced search filters, and docker containerization.
- **Technologies:** React.js, PHP, MySQL, phpMyAdmin, Docker, GitHub, HTML5, CSS3

Machine Learning for River Forecasting

📄 Files

- Developed predictive ML models to forecast river levels using TensorFlow + Scikit-learn.
- Built a Flask dashboard to visualize predictions and historical trends.
- Automated weather API ingestion, storing and serving results from AWS S3.
- **Technologies:** Python, TensorFlow, Flask, REST APIs, AWS S3

Distributed File Storage System

- Designed and implemented a distributed file storage system with data replication capabilities.
- Built consistent hashing mechanism for distributing files across multiple storage nodes.
- Developed client-side application for interacting with the storage service.
- Implemented fault tolerance features to handle node failures without data loss.
- **Technologies:** Java, Spring Boot, REST API, Docker

Education

University at Buffalo, SUNY

Bachelor of Science in Computer Science, Minor in Data-Intensive Computing

Achievements: 3.5 GPA, Dean's List, International Merit Scholarship Awardee.

Technical Skills

Languages: Python, JavaScript/TypeScript, Java, SQL, PHP, C++, Go

Frameworks: React.js, Node.js, Flask, Spring Boot, Bootstrap/TailwindCSS

Databases: MySQL, PostgreSQL, MongoDB, SQLite

Cloud DevOps: AWS (EC2, S3, Lambda), Docker, GitHub Actions, CI/CD, Azure (Basic)

Concepts: OOP, Distributed Systems, Testing Frameworks, Agile Methodology

Certifications & Leadership Experience
