WORK EXPERIENCE

Costume Project Analyst IE Intern

Disney | Anaheim, CA

June 2024-Current

- Created Smartsheet dashboards to promote more collaboration within warehouse efforts in costume inventory movement.
- Installed the use of self-serve PowerBi Dashboards to track progress in projects to coordinate the next best step in eliminating costume data issues between parks.
- Created numerous queries all geared towards cleaning and updating inventory to reflect accurate size, style and material number information and track out-of-circulation garments.
- Pick up ad hoc projects based on discoveries from data results for costuming support team.
- Utilize Excel sheets for weekly invoices that utilize developer mode.

Tech Director | Prop Master - Volunteer

Happy To Be Here Club | La Habra, CA

July 2024-Current

- Started as a technician to train peers to use the lighting and sound equipment, was welcomed into leadership after three months from propositions to grow the club.
- Installed the use of dailies and call schedules to monthly rehearsals and shows, which exponentially increased the efficiency of setup, providing an extra hour of pre-show prep time.
- Created active excel sheets based on form prompts automated with VLOOKUPS to assist with the casting process per month based on availability and experience cast members have.

PR Manager | Technician

BU Tech Crew | Bradley University

Oct 2019-May 2024

- Provided lighting and sound for 30+ events a semester.
- Main liaison between event host and staff, creating billing/invoicing for Tech Crew's services.
- Upkeep organizational budget based on university funding and external event requests to know what staff and equipment we can take up.
- Set up goal system to analyze productivity between setups and tear downs to generate systems for more efficient shifts, creating more time for equipment educating.
- Scheduled meetings between Tech Crew management and organization hosts for large-scale events with third-party vendors, such as concerts with Coin, We the Kings, etc.

Project Specialist - Intern

CNH Industrial | Goodfield, IL

Aug 2023-Dec 2023

- Forecasted robotic welding current state through SQL queries on production data, then reassigned anticipated work for cost-effective solutions to save \$464,945/year.
- Solved overtime issue through conducting time studies on each robot and analyzing databases.
- Designed annual operation plans in addition to quarterly forecasts based on seasonal demands to support the proposed solutions.
- Created plan with all this information on how the company could invest and implement in a new large-frame welding robot, considering the return of investment and rework savings plan.
