

GAGAN REDDY KONANI

+1 (312) 483 9714 | gagankonani2001@gmail.com | [linkedin.com/in/gagan-reddy-konani-8237b6243/](https://www.linkedin.com/in/gagan-reddy-konani-8237b6243/)

Work Experience

- Medtronic, Full Stack Developer** | California, USA *June 2025 - Ongoing*
- Built and owned an internal feedback platform using Next.js, Typescript, and MongoDB, replacing fragmented channels and supporting 1,200+ submissions across teams at scale.
 - Implemented end-to-end features including post creation, voting, threaded comments, filtering, role-based access, and file uploads, with full CRUD APIs, authentication, and secure workflows.
 - Improved feedback discoverability by 41% and increased overall engagement by 62% within two months by streamlining submission and voting flows and improving information visibility.
- University of Illinois at Chicago, Graduate Assistant** | Chicago, USA *Jan 2024 - May 2025*
- Centralized workflows for 3,000+ users, improving efficiency 40% using React, Express, PostgreSQL.
 - Built and maintained RESTful APIs with authentication and role-based access for students, faculty, and administrators, supporting scalable, secure operations across university departments.
 - Supported multi-department adoption through scalable API design and role-based access control.
- Comcast, Full Stack Developer Intern** | Chennai, India *July 2022 - June 2023*
- Developed full-stack applications with Spring Boot backend, React frontend for internal workflows.
 - Designed RESTful APIs and database services to process and report operational data.
 - Improved backend performance and reduced data latency by 25%.

Education

MS in Computer Science, *University of Illinois at Chicago (UIC)* | Chicago, USA *2023-25*
B.E in Computer Science, *Birla Institute of Technology and Science (BITS) - Pilani* | Hyderabad, India *2019-23*

Skills

Languages: C, C++, Python, Java, Ruby, Bash, JavaScript, TypeScript, OOP
Frontend: React, Next.js, HTML, CSS, Tailwind CSS, Authentication
Backend: Node.js, Flask, FastAPI, Spring, Spring Boot, REST & GraphQL APIs
Databases: PostgreSQL, MySQL, MongoDB, DynamoDB
Cloud: EC2, S3, Lambda, RDS, Amplify Gen 2, API Gateway, Cognito, IAM
AI/ML: LangChain, LangGraph, PyTorch, FastAPI

Projects

Pathfinding Visualizer

- Built an interactive React-based visualizer for Dijkstra, DFS, and BFS with real-time animations.
- Implemented algorithms from scratch with dynamic grid controls and path reconstruction.

Agentic Application Builder

- Built an agentic AI system with LangGraph that generates web applications from natural language using Planner, Architect, and Coder agents.
- Implemented structured agent workflows and debugging pipelines, reducing iteration time by 39.6%.
