Education

New Jersey Institute of Technology, Newark, NJ

Expected: Dec 2025

Bachelors of Science, Information Technology

GPA: 3.1

Work Experience

Utility Technologies Intern, PSEG

Newark, NJ

June 2024 – Aug 2024

- Worked on the decommission of a 20+ year old system
- Created several presentations to assist the company's transition into a new system
- Optimized SQL databases with 500,000+ entries to decrease load times by up to 90%
- Created Power BI presentation that visualizes live data.

Projects

-
- **Discourse Community Web Application**
 - Built an interactive villager management system for real time event scheduling, invitations, and notifications across village communities.
 - Developed full-stack features including API endpoints, dynamic modals, real time event scheduling, invitations, and notifications for village communities
 - Implemented scalable backend models and frontend components for village role mapping and calendar coordination
 - **Server Application**
 - Implemented a secure server application using PHP and MySQL to store and manage sensitive data in a phpMyAdmin database
 - Designed a login system to ensure data privacy and security
 - Created a user-friendly web interface to display database contents on successful login
