

Ghulam Jilani

[Kent, OH, USA](#) | [+1 \(234\) 296-2105](#) | ghulamjilani0375@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Summary

Detail-oriented Data & Financial Analyst with a Master's in Data Science and hands-on experience in financial modeling, budgeting, forecasting, and data visualization. Proficient in Microsoft Excel, Power BI, and SQL, with a solid foundation in financial reporting, variance analysis, and KPI development. Strong communicator and collaborator with a passion for translating data into actionable business insights.

Education

Master of Science in Data Science **Aug 2023 - Dec 2024**

Kent State University, OH, USA **GPA: 3.39/4**

Relevant Coursework: Statistical Learning, Computational Statistics, Applied Statistics, Big Data Analytics, Data Mining Techniques, Advance Database System Design

Bachelor of Technology in Computer Science **Jul 2018 - Aug 2022**

Sister Nivedita University, WB, India **GPA: 7.98/10**

Relevant Coursework: Design & Analysis of Algorithms, Machine Learning, Cloud Computing, Mathematics

Skills

- **Analysis & Finance Tools:** Microsoft Excel (Pivot Tables, VLOOKUP, Financial Modeling), Power BI, Tableau (basic), SQL
- **Programming & Modeling:** Python, R, Scikit-learn, NumPy, Pandas, Jupyter
- **Business & Analytics Concepts:** Budget vs Actuals, Forecasting, KPI Tracking, Financial Statement Analysis, Scenario Analysis
- **Soft Skills:** Communication, Team Collaboration, Attention to Detail, Problem Solving

Experience

Data Analyst Intern | KGS Technology Group, Inc. **April 2025 – Present**

- Transform raw data into actionable insights by performing thorough data cleaning and preprocessing.
- Write complex SQL queries to extract and manage data efficiently from multiple databases.
- Design and develop interactive dashboards using Power BI to visualize data clearly and support stakeholder decision-making.
- Monitor and analyze key performance indicators (KPIs) to assess business health and identify areas for improvement.
- Apply statistical methods to interpret data trends and contribute to strategic, data-driven decisions.

Data Science Intern | Let's GrowMore | [LINK](#) **Apr 2022 - May 2022**

- Developed an Iris Flowers Classification model using Logistic Regression and KNN, achieving 97.37% and 94.74% accuracy.
- Developed a Stock Market Prediction model using a Stacked LSTM neural network to forecast stock prices based on historical data and evaluated performance using RMSE.
- Developed a music recommender algorithm analyzing 500,000+ listening patterns; Improved usersatisfaction by 30% and boosted subscription renewals by 15%.
- Developed an image-to-pencil sketch conversion tool using Python and OpenCV by applying grayscale,

inversion, and Gaussian blur techniques to generate sketch effects.

Data Science Intern | The Spark Foundation | [LINK](#)

Mar 2022 - Apr 2022

- Developed a linear regression model to predict student scores based on study hours using Python and Scikit-learn
- Implemented K-Means clustering on the Iris dataset to predict the optimum number of clusters and visualized the results using Python and Scikit-learn. Analyzed company data to assess sales, profit trends, and pricing strategies, providing insights for profitability optimization.
- Conducted exploratory data analysis on IPL datasets to identify key trends and patterns.

Shift Manager | Tahini | Kent State University

Sep 2023 - Oct 2024

- Managed inventory and tracked cost efficiency, reducing overheads by ensuring lean operations.
- Created shift schedules and improved labor-hour forecasting based on store traffic analysis.

Projects

Credit Card Fraud Detection Project Using Python | [LINK](#)

Dec 2024

- Developed a machine learning model with 92% accuracy to detect fraudulent credit card transactions, enhancing customer security and preventing unauthorized purchases.
- Employed techniques like under-sampling to balance highly imbalanced data and used logistic regression for predictive modeling, achieving optimal results on a real-world dataset.

Zomato Data Analysis Project using Python | [LINK](#)

Jul 2024

- Explored and visualized customer and restaurant data using Python, focusing on customer preferences, ratings, and spending behavior.
- Revealed insights such as the popularity of dining restaurants, higher ratings for online orders, and restaurant types that receive more offline orders through data cleaning, EDA, and visualization.

Cryptocurrency Price Prediction Using Ensemble Model | [LINK](#)

May 2024

- Developed a predictive model leveraging ensemble techniques, machine learning, and deep learning algorithms to forecast cryptocurrency prices for enhanced investment decision-making.
- Implemented data-driven strategies to improve prediction accuracy and reliability, focusing on specific cryptocurrencies requested by users for personalized forecasting.

Power BI Dashboard Project | [LINK](#)

Dec 2023

- Developed an interactive dashboard for monitoring and analyzing online sales data.
- Employed intricate parameters for deep-diving into worksheets and customization via filters and slicers.

Certifications

• **IBM Data Science Professional Certification:** Coursera | [CERTIFICATE](#)

Feb 2023

- Earned 5-star ratings in C and C++, and 4-star ratings in Python, SQL, and Core Java on the HackerRank coding practice platform. [LINK](#)

- **Visa Status:** F1 OPT (Optional Practical Training, STEM) – Authorized to work in the U.S. for up to 3 years.

- **Availability:** Immediately available for on-site, remote, or hybrid opportunities.
