

GUNJAN SHARMA

+1 (929) 425-6658 | Herndon, Virginia, 20170 | gunsharm0509@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Seasoned **Data Analyst** with over **3.5** years of experience in **big data analytics** and **predictive modeling**. Proficient in **SQL, Python, Tableau**, and **Google Big Query** in both cloud and local environments. Skilled in designing data pipelines, developing interactive reports, and automating business logic. Proven track record in enhancing **data quality**, **developing data-driven strategies**, and improving **operational efficiency** and **customer satisfaction**.

TECHNICAL SKILLS

Data Analysis & Visualization: Tableau, Power BI, Google Big Query, Excel, R Studio, Jupyter Notebook, Google Analytics

Database & Data Management: PostgreSQL, MySQL, SQL Server Management Studio, AWS (S3, EC2, Lambda, Redshift, RDS, Glue, CloudFormation), Google Analytics, Hadoop, Hive, Pig, Docker, Salesforce

Programming & Scripting Languages: Python (NumPy, Pandas, BeautifulSoup, SciPy, NLTK, scikit-learn, Keras, TensorFlow, PyTorch, seaborn, plotly, matplotlib), R (tidyverse, dplyr, ggplot, ggplot2), SQL, PLSQL, Postman (for API testing)

Machine Learning & Statistical Analysis: Hypothesis Testing, Confidence Interval, Linear Regression, Logistic Regression, Decision Trees, KNN, Random Forest, Naïve Bayes, K-Means, Natural Language Processing, Bagging and Boosting (Using python & R libraries)

EXPERIENCE

Mercatus Center

Arlington, VA, USA

Data Analyst

May 2023 – Present

- Developed and executed a detailed **data strategy**, aligning **data governance** practices, resulting in a **15% increase in data accuracy**
- Used **Google BigQuery** for **Google Analytics data**, boosting accuracy by 25% and increasing engagement and conversions by 15%
- Integrated **Salesforce CRM** with **AWS S3** within a tight Q2 deadline, enabling secure storage for large customer datasets
- Achieved a 90% reduction in data loss risk by **API-driven Python** automation to revolutionize link updating for legacy Google Drive
- Designed a customer retention dashboard using **SAS** and **AI** modeling techniques (**Gradient Boosting Machines**), achieving over **90% prediction accuracy** for identifying **customer churn** and informing **retention strategies**
- Utilized **Salesforce & Tableau** dashboards to boost lead discovery by 35% via the visualization of the district's lead database
- Mentored junior analysts, enhancing their **data analysis and visualization skills**, contributing to a **20% boost** in team productivity
- Employed **SAS** for **Agile project management**, ensuring timely adherence, resource allocation, and successful early product launch
- Led stakeholder meetings to update on **project progress**, **address concerns**, and gather feedback for **continuous improvement**

Oracle India

Bangalore, KA, IN

Data Analyst

Sep 2020 – Aug 2022

- Optimized **cloud and data pipelines** for DOTs Australia, **enhancing** real-time analytics for routing and supply chain logistics by **50%**
- Built a 2.7x faster robust **MySQL database** backup and recovery protocols to minimize data loss and streamline system restoration
- Deployed a **Hypercare model** using **ETL** pipelining to manage client data, **increasing** client satisfaction from **65% to 95%**
- Utilized **NoSQL databases** to handle unstructured data, improving scalability and increasing data processing efficiency by **30%**
- Streamlined project handover processes by **25%** through **Excel Macros** and **SQL reports**, improving data management and analysis
- **Enhanced** risk analysis accuracy by **3%** for **financial and banking services** across 11 countries through customized **SQL BI** reports
- **Achieved 100%** remote delivery with data **extraction, migration, analysis**, and integration in **Oracle Fusion ERP** for Oracle Japan

PROJECTS

Driving Platform Improvement: A Deep Dive into Airbnb Listings Data and Trends

- Performed data **cleansing**, preprocessing, and exploratory **analysis** across **100,000** listings & 58 feature variables using **R**
- Executed logistic regression, decision trees, random forest, and **XGBoost** to predict project success, achieved **92% accuracy**

Unleashing Data Insights: Transforming Restaurant Experiences through Analytics on Yelp Reviews with AWS

- Conducted data cleansing, **preprocessing**, and exploratory analysis across **200M+** records and 87 columns using S3, Glue, and EMR
- Implemented SentimentIntensityAnalyzer to score over textual reviews, revealing customer sentiments across various businesses

Smart Parking DOTs Database: Enhancing Revenue and Real-Time Decision-Making

- Designed an **ER model & relational model**, and implemented normalization to create a database using **SQL** for storage & analysis
- Generated visualizations using **Tableau** dashboards and stories to track customer traffic and reduce congestion in parking lots

Goodreads Exploration: Fueling Amazon's Sales, Marketing & Growth

- Built a quality book score with 50+ features to rank books, driving personalized recommendations and boosting user engagement
- Executed **Python-based KNN** Book Recommender system on 1.2M+ records, enabling strategic user personalization

EDUCATION

University of Maryland, Robert H. Smith School of Business

Master of Science in Information Systems (GPA – 3.6/4.0)

College Park, MD, USA

Aug 2022 – Dec 2023

Vellore Institute of Technology, Department of Engineering

Bachelor of Technology, Electronics & Communication Engineering (GPA – 3.85/4.0)

Vellore, TN, IN

Jul 2016 – Jun 2020
