## EXPERIENCE

---

### Accenture Private Solutions Limited, Software Development Engineer

Hyderabad, India (Jan 2022 – Dec 2022)

- Contributed to the project using ReactJS, Redux, HTML5, CSS3, JavaScript, Spring Boot and microservices, enhancing business operations.
- Developed and maintained backend services using Spring Boot and Tested the end points using Postman, focusing on creating efficient, scalable, and secure APIs to support frontend applications.
- Implemented robust, testable service layers and implemented Redux Toolkit to streamline Redux setup and reduce boilerplate code, improving development speed and code clarity.
- Employed advanced React patterns, including Higher-Order Components (HOCs) and Render Props, to enhance component reusability and flexibility.
- Developed and maintained a scalable Redux store structure, incorporating middleware to handle asynchronous actions and side effects efficiently.
- Mastered the use of React-Redux bindings, facilitating efficient state management and predictable state changes across complex applications.
- Aligned project requirements with business goals in a collaborative Agile environment, ensuring the feasibility of UI and UX designs.
- Implemented Native Ahead-of-Time (AOT) Compilation and overall performance by compiling code into native machine code during the build process.
- Leveraged the JSON serialization capabilities in Spring Boot to efficiently handle complex data structures, data interchange between the client and server.
- Key Achievements:** Rising Star, Pinnacle Awards FY22, successfully presented pre-release demo, earning accolades for boosting client satisfaction.

### Accenture Private Solutions Limited, Software Development Engineer

Hyderabad, India (Jan 2021 – Dec 2021)

- Addressed and resolved both cosmetic and functional issues in legacy code, contributing to six successful project releases and live deployments.
- Proactively identified and rectified defects, ensuring seamless application performance during pre- and post-production phases.
- Implemented robust version control practices using Git, employing effective branching strategies to manage complex codebases.
- Optimized API calls by implementing caching strategies in React and pagination in Spring Boot endpoints, significantly reducing server load and improving application performance. This approach resulted in a 40% reduction in API response times for frequently accessed data.
- Implemented comprehensive testing strategies using Jest, integrating automated testing into CI/CD pipelines for enhanced code quality and reliability.
- Integrated Jest with continuous integration pipelines, automating test execution and reporting as part of the development workflow.
- Utilized command-line utilities and build tools such as Webpack to streamline development workflows and improve project efficiency.
- Followed Agile methodologies and adhered to all phases of the SDLC, from requirements gathering to deployment and maintenance.

## TECHNICAL SKILLS

---

**Languages:** C/C++, Java, C#, Python, SQL, Apex, JavaScript, TypeScript, SOQL Salesforce, Kafka, Node.js, .Net Framework, XML

**Frontend:** HTML/CSS, Tailwind CSS, Gatsby, Bootstrap, React, React Native, Figma

**Backend:** Spring boot, Express, Node, IBM Db2, MySQL Workbench/Shell, Flask, Jest, PostgreSQL, MongoDB

**DevOps & CI/CD:** Git, GitLab CI/CD, GitHub, Docker, Kubernetes, Bit Bucket, Linux/Unix, Bash, NPM, Jenkins

**APIs and Web Services:** RESTful, Postman, SOAP, Graph-QL, AWS, Azure, Google Cloud Platform, IBM cloud, Firebase

**Certifications:** Google Advanced Data Analytics Specialization & Capstone, Google Configuration Management & the cloud, Rest APIs Intermediate, AWS Educate Web Application Builder, Azure Fundamental – AI 900, ChatGPT Prompt Engineering – Deep Learning.AI

## PROJECTS

---

**Diabetes Mellitus Prediction using Auto AI: (JavaScript, JSON, Python, IBM cloud):** Applied SVM, Logistic Regression, and ANN on Dataset, achieving high accuracy and Utilized Watson Studio and Node-RED for data analysis and visual programming.

**Fits-Hit Fitness App: (MERN (MongoDB, Express, React, Node.js), Redux):** Developed a full-stack fitness app using the MERN stack and Redux for state management, implementing robust user authentication, feature-rich mobile interfaces with React Native, and optimizing performance for scalability and real-time data synchronization. ensuring a seamless user experience and effective collaboration through version control with Git.

**Med-Search, powered by AI: (C#, .NET framework, ASP.NET Core, ML.NET, jQuery, Bootstrap, MySQL):** Developed an AI-powered search engine for medical documents using .NET, used logistic regression and support vector machines to rank and score search results based on relevance.

**Movie Rating Analysis: (Python, Lisp Miner, Weka, Orange):** Built optimized classifiers (Orange, Weka) for 9,000 movies, elevating F-score. Applied Lisp-Miner for actionable rules, enhancing ratings and box office success. Spearheaded feature engineering for holistic customer insights.

**Intelligent Medical Diagnosis System (Python, HTML, CSS, MySQL):** Developed an intelligent rule-based for medical diagnosis and treatment recommendation, integrating natural language processing (NLP) with Python's NLTK library and machine learning algorithms using scikit-learn.

## EDUCATION

---

University of North Carolina at Charlotte, Master's in Computer Science,  
Malla Reddy Engineering College for Women, Bachelor of Technology in Computer Science,

Charlotte, NC (Jan 2023 – May 2024)  
Hyderabad, India (July 2017- July 2021)
