SUMMARY

Dynamic Business Analyst with over 4 years of experience delivering impactful solutions in the global insurance and IT services sectors. Skilled in aligning business goals with technology strategies to optimize processes. Proven expertise in working with teams to deliver cloud-based solutions and ERP system integrations. Adept in applying Agile and Waterfall methodologies to efficiently manage requirements, documentation, and project delivery. Strong analytical background in performing GAP and Cost-Benefit Analysis. Known for driving initiatives that improve system efficiency, reduce costs, and enhance operational effectiveness across diverse industries.

SKILLS

Methodologies: SDLC, Agile, Waterfall	Excel, MS SharePoint, Jira, Confluence
Documentation: FRD, BRD, SRS, User Stories, Personas, Solution Scenarios	Visualization & Cloud Tools: Tableau, Power BI, AWS, Azure, GCP, DataBricks
Analysis & Reporting: GAP Analysis, Cost/Benefit Analysis, Risk Analysis, SWOT Analysis, Impact Analysis	Technical Skills: SQL, Microsoft Visio, Figma, HP Quality Center
Project Management Tools: MS Project, MS	Soft Skills: Leadership, Time Management, Problem-Solving, Negotiation, Decision-Making, Documentation, Verbal Communication

WORK EXPERIENCE

Metlife, USA

Business Analyst

Jan 2024 - Present

- Orchestrated the rollout of ERP modules, streamlining operations for MetLife’s life insurance and annuity services, enhancing process efficiency by 25% through automation and system integration.
- Partnered with business stakeholders to extract and define ERP system requirements, documenting them in detailed BRDs and FRDs, facilitating clear communication and alignment with business objectives.
- Performed a comprehensive GAP analysis to evaluate existing system limitations, recommending solutions that optimized business workflows, reduced bottlenecks by 30%, and enhanced system performance.
- Constructed Tableau dashboards to provide visual insights into key performance metrics, enabling decision-makers to track business performance and support real-time strategic decisions.
- Utilized MS Project to effectively manage timelines, resources, and milestones, delivering ERP enhancements on time and improving MetLife’s operational efficiency by 95%.
- Facilitated collaborative JAD sessions with stakeholders to prioritize key system features and ensure alignment of ERP enhancements with broader business goals.
- Conducted User Acceptance Testing (UAT) for system updates, ensuring all new functionalities met business needs and reducing deployment errors by 20%.
- Identified opportunities to automate manual processes within MetLife’s systems, leading to a 15% reduction in operational costs while enhancing scalability and security.

Mphasis, India

Business Analyst

Jan 2020 - Jun 2022

- Contributed to the integration of cloud solutions for banking clients, streamlining business processes and improving efficiency by 20%, ultimately supporting their digital transformation initiatives.
- Collaborated with project teams to customize and implement AI-driven solutions, increasing the processing capabilities of client systems and delivering 15% higher operational performance in financial services.
- Conducted cost-benefit assessments for various digital transformation projects, identifying significant cost-saving opportunities that lowered overall project expenses by 10% while ensuring high-quality results.
- Created detailed data flow diagrams and process flow diagrams, mapping out cloud solutions and ensuring smooth implementation for enterprise clients in banking and healthcare industries.
- Worked closely with technical teams to troubleshoot ERP system issues for clients, ensuring business continuity by minimizing system downtime by 25%.
- Led the creation of Requirement Traceability Matrices (RTM) for cloud-based implementations, ensuring business requirements were met throughout the entire project lifecycle.
- Supported clients in adopting cybersecurity solutions, helping to safeguard critical business data and meet compliance regulations, enhancing risk management in highly regulated sectors.
- Developed detailed business requirements documents for AI and cloud application projects, ensuring smooth client transitions to new technologies and improved user experiences.
- Assisted in the design of customized application solutions for clients in insurance and banking, enabling scalable, secure, and efficient digital operations across global enterprises.

EDUCATION & CERTIFICATION

Master of Science in Information Systems	May 2024
University of Colorado Denver, Denver, CO	
Bachelor of Engineering in Electronics and Instrumentation	Jul 2021
JNTU - CVR College of Engineering, Telangana, India	
NetSuite Certified Suite Foundation
