Dallas, TX | +1 (903)-744-8341 | harshitha.neerukonda02@gmail.com | [LinkedIn](#)

SUMMARY

Technical Business Analyst with 4+ years of experience driving data-driven decision-making, process optimization, and AI-enabled business initiatives across enterprise environments. Built a strong foundation in analytics, **KPI** measurement, reporting, **SQL**, **Python**, and experimentation before advancing into automation, workflow transformation, and **AI solution** delivery. Experienced in partnering with business and technical stakeholders to define requirements, improve operational efficiency, validate solutions, and translate complex business needs into measurable outcomes through **Agile** execution.

PROFESSIONAL EXPERIENCE

AI Business Analyst | Uber | USA

Jan 2026 – Present

- Defined **18 business requirements**, **35 acceptance criteria**, and conversational workflows for an **AI-powered customer support assistant**, enabling automated handling of customer inquiries across **12 support categories**.
- Facilitated **12 stakeholder workshops** with product, operations, and engineering teams to identify AI automation opportunities, document business rules, and align chatbot functionality with customer support objectives.
- Authored **40 user stories** and managed backlog prioritization across **4 Agile teams**, supporting delivery of Generative AI capabilities that streamlined support request routing and knowledge retrieval processes.
- Executed **30 UAT scenarios** and **15 SQL validation checks** for AI-driven support workflows, validating response accuracy, escalation logic, and data consistency before production deployment.
- Established **10 operational KPIs** and reporting metrics using **SQL**, **AWS**, and **dashboarding tools** to monitor chatbot adoption, support volume trends, case resolution tracking, and business performance outcomes.
- Coordinated resolution of **20 application defects and enhancement requests** through Jira-based tracking and stakeholder collaboration, improving stability and usability across **3 AI-powered support modules**.

Technical Business Analyst | Dell Technologies | India

Sep 2022 – Dec 2023

- Directed requirements analysis across **3 enterprise data modernization initiatives**, partnering with business and engineering teams to document functional requirements, technical specifications, and solution delivery priorities.
- Mapped **9 cross-application workflows** using **Visio**, process analysis, and stakeholder interviews, identifying **15 process improvement opportunities** that streamlined operational reporting and data movement processes.
- Defined **ETL requirements**, **API integration requirements**, and **source-to-target mappings** for **14 data entities** using **SQL**, **Azure SQL**, and **Amazon Redshift**, enabling reliable data integration and enterprise reporting capabilities.
- Collaborated with developers, architects, and data engineers to document **22 API endpoints**, integration workflows, and data contracts supporting system interoperability across enterprise platforms.
- Implemented **40+ SQL-based validation and reconciliation checks** across Azure SQL reporting environments, improving data quality and supporting accurate downstream reporting and analytics.
- Assessed **12 operational workflows** through **SQL analysis**, **Python-based data exploration**, and stakeholder reviews, identifying automation opportunities that reduced manual reporting dependencies.
- Accelerated stakeholder signoff across **60+ UAT scenarios** through Jira-driven defect management, release validation, and traceability reviews, supporting successful deployment of enterprise applications.

Business Analyst | Robosoft Technologies | India

Nov 2019 – Aug 2022

- Analyzed **50+ operational data elements** using **SQL** and **Python**, performing KPI analysis and trend evaluation that supported data-driven recommendations across product and marketing initiatives.
- Developed **7 executive dashboards** and **19 reporting metrics** using **Power BI**, **Tableau**, and augmented analytics capabilities, improving performance visibility and enabling leadership teams to monitor critical business outcomes.
- Conducted **14 root-cause investigations** through **SQL-based analysis** and reporting reviews, identifying operational issues that improved reporting reliability and stakeholder decision-making.
- Evaluated **8 A/B testing experiments** using **Python**, statistical techniques, and business metrics, supporting product enhancement decisions and optimization initiatives across customer-facing workflows.
- Authored functional documentation for **26 reporting requirements** and **5 operational initiatives** within **Confluence**, improving delivery consistency and requirements transparency within **4+development teams**.
- Facilitated **18 stakeholder workshops** and translated business needs into **43 user stories** within **Jira**, strengthening collaboration between business teams and solution delivery groups.
- Identified **8 workflow automation opportunities** through process assessments and reporting analysis, supporting **Power Automate** initiatives that reduced manual effort across **3 internal business functions**.

TECHNICAL SKILLS

- Business Analysis:** Requirements Elicitation, BRD/FRD, User Stories, Acceptance Criteria, RTM, Use Cases, Business Rules, Gap Analysis, Change Impact Analysis, Root Cause Analysis, As-Is/To-Be Analysis, Enterprise Solution Analysis
- AI, Analytics & Reporting:** Generative AI, AI Use Case Identification, AI-Powered Analytics, AI-Assisted Documentation, AI/ML Reporting, Responsible AI, KPI Monitoring, Operational Analytics, Predictive Analytics, Data Storytelling, Executive Reporting & Dashboarding, Tableau GPT, Power BI Copilot, Data-Driven Decision Making
- Data, Integration & APIs:** SQL, ETL Requirements Definition, Source-to-Target Mapping, API Integration Requirements, REST APIs, API Endpoint Documentation, AI Service API Requirements, ICD, Technical Requirement Documentation (TRD), Data Dictionaries, Data Validation, Data Reconciliation, Backend Verification, Exception Analysis
- Automation & Process Optimization:** Workflow Automation, Power Automate, Automated Data Validation, Data Quality Checks, Process Mapping, Process Mining, Task Mining
- Tools & Platforms:** Tableau, Power BI, Jira, Confluence, Visio, Salesforce CRM, Azure SQL, Amazon Redshift, Azure, AWS
- Methodologies:** Agile, Scrum, SDLC, Sprint Planning, Backlog Grooming, UAT, Dev/QA Coordination, Production Support

EDUCATION

Master of Science in Business Analytics & Artificial Intelligence | University of Texas at Dallas | Texas

Jan 2024 – Dec 2025
