EDUCATION

Master of Science in Computer Science
[Arizona State University, Tempe, Arizona](#)

August 2022 – May 2024

Bachelor of Technology in Information Technology
[Vidya Jyoti Institute of Technology, Hyderabad, India](#)

July 2016 – June 2020

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, C, SQL
- **Databases:** MySQL, MongoDB, Cassandra
- **Data Visualization & Analysis:** Tableau, Microsoft Excel, Power BI
- **Cloud & Big Data:** AWS, Apache Spark, Hadoop, Hive
- **Development Tools & Version Control:** Visual Studio, GitHub
- **CI/CD & Messaging Systems:** Jenkins, Active MQ
- **Frameworks & Technologies:** Spring Boot, Microservices, XML
- **Methodologies:** Agile, Scrum
- **Integration & APIs:** RESTful APIs, Data Integration, ETL
- **Best Practices & Architectures:** Secure Coding Best Practices, Fault-Tolerant Architectures
- Project Management

PROFESSIONAL EXPERIENCE

Capgemini
Software Development Engineer

India
November 2020 – August 2022

- Constructed and developed scalable RESTful APIs and integration solutions, achieving improvement in system efficiency using Mule ESB and Anypoint Studio.
- Implemented mUnit framework and established QA processes, reducing deployment errors by 40% through a streamlined CI/CD pipeline.
- Secured SOAP-based APIs and enforced LDAP Security Manager policies, enhancing application security and compliance.
- Led Agile ceremonies and conducted code reviews, decreasing configuration errors and improving team productivity.
- Delivered operational support and resolved complex issues, maintaining an SLA compliance rate of 15% for ticket management.
- Collaborated with clients on architectural discussions, influencing the adoption of technical solutions.
- Applied HTML and CSS to develop interactive dashboards and reports, improving user engagement and data visualization.

PROJECTS

Online Shopping

August 2018 – July 2018

- Engineered a complete data pipeline integrating Kafka, Spark, Hadoop, Python, MySQL, Cassandra, and Superset, resulting reduction in data processing time.
- Developed and deployed Spring Boot microservices, improving application scalability and reducing deployment time.
- Architected microservices to manage eCommerce data, leading to a 25% increase in system reliability and performance.
- Optimized data integration processes, enhancing real-time data analytics capabilities.
- Employed error handling and logging mechanisms, which decreased system downtime by 20%.

Inventory Management System

January 2020 – February 2020

- Constructed and executed a scalable Java-based microservices architecture to streamline inventory processes, resulting increase in system efficiency.
- Established RESTful APIs with Spring Boot, integrating with existing databases and services, which improved data retrieval speed by 40%.
- Enhanced microservice performance through code refactoring and JVM tuning, achieving reduction in response times.
- Deployed services using Docker and Kubernetes, ensuring seamless scaling and management, and reducing deployment.

CERTIFICATIONS

- Earned MuleSoft Certified Developer - Level 1 – Salesforce.
- Obtained Dell Boomi Associate Integration Developer Certification.
- Achieved Cloud Computing Certificate – NPTEL.
