Chicago, Illinois (Open to Relocate) | +1 (312) 866-3145 | Hitanshishah001@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Business Analyst with 4+ years of experience owning business analysis across **payments, digital banking, and retail**, leading **stakeholder workshops** and partnering with **Product, Engineering, Operations, Risk, and Compliance** teams. Experienced in **requirements engineering, BRDs/FRDs, user stories, process improvement, BPMN, Agile Scrum, UAT, release readiness, and stakeholder management**. Proficient in **SQL, Python, Power BI, Snowflake, Advanced Excel, Alteryx, REST APIs, and Microsoft Power Platform** to build **analytics solutions**, automate workflows, and optimize processes.

TECHNICAL SKILLS

Business Analysis: Requirements Elicitation & Engineering, BRDs, FRDs, Functional & Non-Functional Requirements (NFRs), User Stories, Acceptance Criteria, RTM, Business Rules, Gap Analysis, Business Process Improvement (BPI), BPMN, Process Mapping, Workflow Optimization, Stakeholder Management, Root Cause Analysis (RCA), MoSCoW Prioritization

Agile & Delivery: Agile Scrum, SDLC, Sprint Planning, Backlog Refinement, Release Planning, User Story, Jira, Confluence, UAT

Data Analytics & Business Intelligence: SQL, Python, Power BI, Tableau, Snowflake, Advanced Excel (Power Query, Power Pivot, DAX), KPI Dashboards, Executive Reporting, Performance Scorecards, Operational Analytics, Trend Analysis, Data Visualization

Data Management & Integration: ETL, Alteryx, Data Modeling, Data Warehousing, Data Validation, REST APIs, JSON, XML

Automation & Cloud: Microsoft Power Platform (Power Automate, Power Apps), Microsoft Copilot, Salesforce, AWS (Redshift, S3, QuickSight)

Governance: GDPR, CCPA, SOX Compliance, RBAC, Data Privacy, Audit Support

PROFESSIONAL EXPERIENCE

Business Analyst, PayPal

Oct 2024 – Present | United States

- Led **end-to-end business analysis** for **merchant onboarding**, partnering with **Product, Merchant Operations, Risk, Compliance, and Engineering** to gather requirements, analyze workflows supporting **42K+ annual applications**.
- Designed **executive dashboards** and **KPI scorecards** using **Power BI, SQL, and Snowflake** to monitor **18M+ monthly payment transactions**, providing visibility into **authorization, settlement, disputes, refunds, chargebacks, and merchant health**.
- Evaluated **payment workflows, customer journeys, and checkout funnels** across web and mobile platforms using **SQL, Python, and Advanced Excel** to identify **conversion bottlenecks and merchant trends, lifting payment completion rates**.
- Established **business rules, KPI frameworks, functional requirements, and reporting standards** for merchant onboarding, payment operations, dispute management, and operational SLAs, standardizing performance measurement across **six business units**.
- Oversaw business process improvement initiatives for fraud review and dispute operations by performing future-state analysis, **BPMN modeling** and **Root Cause Analysis (RCA)**, reducing manual case routing by **430 hours annually**.
- Facilitated discovery workshops with Product, Treasury, Risk, Compliance, and Engineering to capture **business requirements, user stories, acceptance criteria, and release priorities across the delivery lifecycle**.
- Coordinated User Acceptance Testing (UAT) for merchant onboarding and payment releases, defining **business validation scenarios and managing defect triage across 500+ test cases**.
- Implemented automated reporting and workflow processes using **Microsoft Power Automate, Microsoft Copilot, SQL, and Power BI**, raising reporting accuracy and cutting report preparation time from **14 hours to under 3 hours** per reporting cycle.

Business Analyst, Hexaware Technologies

Mar 2021 – Aug 2023 | India

- Conducted requirements elicitation workshops with stakeholders to gather, analyze, and document requirements, **BRDs, FRDs, SRS, RTMs, user stories, business rules, and acceptance criteria**, supporting **20+ enterprise releases** across digital banking, payments, and retail.
- Performed **current- and future-state analysis** for customer onboarding, KYC, AML, lending, payment operations, and order management using **BPMN, Visio, and Lucidchart**, identifying improvements that reduced onboarding **turnaround by two business days**.
- Collaborated with **Product Owners, business stakeholders, and engineering teams** to drive **backlog refinement, sprint planning, release planning, and story prioritization** using **Agile Scrum, Jira, Confluence, and MoSCoW**, delivering **150+ user stories**.
- Drove Business Process Improvement (BPI) initiatives** using **BPMN, Root Cause Analysis (RCA), and Value Stream Mapping** to streamline **reconciliation, inventory, and customer service processes**, eliminating redundant approvals and saving **1,500+ hours annually**.
- Directed **User Acceptance Testing (UAT)** by preparing **business test scenarios and resolving 350+ defects** and change requests through **production deployment and hypercare support**.
- Built **executive Power BI dashboards and KPI scorecards** using **SQL, Snowflake, and Advanced Excel** to monitor **payment operations, revenue, fraud, and retail performance**, cutting executive reporting effort by **more than 75%**.
- Analyzed over **9M payment, customer, and retail transactions** using **SQL, Python, and Alteryx**, identifying **reconciliation issues, fraud indicators, pricing anomalies, and operational trends**.
- Partnered with **Data Engineering** teams to define **business rules, data mapping, REST API requirements, and ETL workflows** using **Snowflake, Talend, and Informatica**, strengthening data quality and reporting consistency.

EDUCATION

Illinois Institute of Technology, Chicago, Illinois

Master of Science in Information Technology

Aug 2023 – May 2025
