PROFESSIONAL SUMMARY:

Detail-oriented Business Analyst and Team Facilitator with 4+ years of experience working directly with stakeholders and customers to identify business solutions. Experienced in using agile methodologies to lead cross-functional teams to ship quality products. Skilled in translating customer needs into actionable requirements that drive product development and innovation. Adept in user data analysis including identifying underlying user needs and deriving meaningful products. Seeking to transform stakeholder visions into tangible realities through continuous delivery.

SKILLS:

- **Project Ownership & Leadership:** Expertise in taking complete ownership of projects, from initiation through delivery, ensuring alignment with product requirements.
- **Software Development Life Cycle:** Strong understanding of SDLC and scalability principles, proficient in identifying and troubleshooting issues, and optimizing processes for efficiency.
- **Risk Management:** Proactive risk identification and mitigation, capable of facilitating trade-off decisions and resolving obstacles.
- **Agile & Scrum Practices:** Skilled in leading Scrum meetings, sprint reviews, and retrospectives. Proficient in Jira for task tracking, backlog grooming, and project management.
- **Team Collaboration & Communication:** Effective at collaborating with designers, developers, and product owners to integrate product components. Strong facilitator of cross-functional communication.
- **Resource Allocation & Task Prioritization:** Adept at allocating resources efficiently, planning sprints, and prioritizing tasks for optimal project completion.
- **Tools and Software:** Jira, Slack, Miro, Zoom, Trello, Confluence

PROFESSIONAL EXPERIENCE:

PayPark - Playpark SaaS solution designed to simplify and enhance the vehicle parking experience for both users and parking facility administrators.

Agile Business Analyst

June 2023 – Present

- Applies thorough analysis and critical thinking to gather and interpret business requirements, enabling the delivery of accurate and actionable insights.
- Creates and refines user stories, ensuring clear and concise communication of requirements between business stakeholders and development teams.
- Collaborates with cross-functional teams to identify and address bottlenecks in the development process, resulting in a 10% reduction in cycle time and faster time-to-market for products.
- Utilizes Jira to track and manage project progress, backlog, and sprint planning, ensuring 10% increase on efficient workflow and transparency.
- Contributed to a increase in product adoption by analyzing user feedback and driving iterative improvements based on customer needs.
- Actively participates in agile ceremonies including sprint planning, daily stand-ups, sprint reviews, and retrospectives, fostering collaboration and driving continuous improvement.
- Facilitates user acceptance testing (UAT) sessions, ensuring successful deployment of software solutions by validating functionality, conducting test case scenarios, and resolving issues in a timely manner.
