SUMMARY

Full-Stack/Backend Engineer with 3+ years of experience in developing, testing, and deploying web applications using microservice architecture. Skilled in Java, JavaScript, and Python, with hands-on expertise in Spring Boot, Docker, AWS, MySQL, and CI/CD pipelines. Proven track record in optimizing system performance, automating processes, and mentoring team members to enhance efficiency. Experienced in Agile methodologies to deliver scalable and high-quality software solutions.

WORK EXPERIENCE

JD Finish Line - Indianapolis IN, United States | *Software Engineer*

July 2024 - Feb 2025

- Enhanced store shipment microservice by improving Spring Boot-based shipping logic and label generation.
- Automated customer notifications with Python Airflow, preventing millions in losses from abandoned items.
- Mentored team members by leading knowledge transfer sessions and providing technical guidance to engineers.
- Resolved a long-standing shipment issue that caused weeks-long trailer backups by fixing missing Advanced Shipping Notices, improving delivery timelines and reducing delays.
- Processed large shipments using Google Cloud Storage and BigQuery for vendors like Nike and Adidas.
- Tested and deployed updates for shipment services using JUnit, Jenkins, and Spinnaker.

SynergisticIT - Fremont CA, United States | *Full-Stack Engineer*

Jan 2023 - July 2024

- Developed highly-scalable, Spring Boot-based Java microservices backend systems for multiple applications, reducing page load times by 35% and handling 100,000+ concurrent users.
- Implemented fixes and features in Javascript applications using React, Redux and ES6, leading to a 20% increase in user satisfaction.
- Dockerized microservices using Docker and deployed containers on EC2 instances utilizing AWS ECR/ECS.
- Designed a Jenkins CI/CD pipeline, reducing manual testing time by 60% and accelerated feature rollout by 40%.
- Implemented user-friendly and responsive front-end pages using JSTL, JSP, Spring MVC, and Bootstrap.
- Employed Postman for API testing and Git for version control, ensuring code quality and efficient collaboration.

Purdue University - Lafayette IN, United States | *Full-Stack Engineer*

Feb 2022 - Dec 2022

- Visualized medical events for 3 hospitals in uncovering disease progression patterns with Harvard.
- Refactored legacy codebase in the visualization software, improving system stability by 50%.
- Developed a script to generate 10,000+ realistic mock patient data for testing visualization tool accuracy.
- Improved frontend user experience by optimizing UI elements for better interaction and performance.

Omesti - Remote, Malaysia | *Full-Stack Engineer*

May 2020 - Dec 2020

- Implemented the upgrade plan for NextAGM, a video conference web application used by government officials.
- Boosted productivity and meeting efficiency by 25% through the implementation of new user profile features.
- Integrated a call timer which led to a 20% reduction in meeting durations and a 30% increase in user satisfaction.

CERTIFICATIONS

Oracle Certified Professional Java SE 17 Developer

March 2024

SKILLS

Programming Languages: Java, JavaScript, Python

Technologies: Spring/Spring Boot, Kafka, JUnit, Mockito, ReactJS, Node.js, Apache Airflow

DevOps & Cloud: Jenkins, Spinnaker, AWS, GCP, Docker

Databases: MySQL, Oracle SQL, MongoDB

Tools: Eclipse/VSCode, Git/Github, Jira, Postman, Agile Methodologies (Scrum, Kanban)

EDUCATION

Purdue University - Bachelor of Science in Computer Engineering

May 2023
