

JONATHAN CARLOS DIAZ

(661) 621-1018 | Valencia, CA | johnnycdiaz@gmail.com | www.linkedin.com/in/johnnycdiaz

EDUCATION

California State University Northridge

B.S. in Information Systems (CSUN GPA: 3.95) | Cum Laude | Dean's List: All semesters | 2 Honors Clubs

College of the Canyons

A.S. in Mathematics (Math GPA: 4.0) | Cum Laude | MESA | NASA Student Engagement via Aerospace Club

SKILLS

- **Programming:** SQL, Python, Jupyter Notebooks, GitHub, Tableau, Power BI, R Studio, Java
- **Data Analysis:** Database Management, Matplotlib, Pandas Seaborn, Plotly, Dashboard, Folium, A/B Testing
- **Data Processing:** Pandas, NumPy, BeautifulSoup, API Integration, JSON, EDA, Data Wrangling
- **Statistical & Predictive Modeling:** Excel Descriptive Statistics, Frequency Analysis, Crosstabulations, Linear & Logistic Regression, Model Evaluation (R^2 , p-values), Data Distribution & Skewness Analysis, Predictive Modeling for Outcome Classification, VLOOKUP, DAX
- **Machine Learning:** Scikit-Learn, Decision Trees, KNN, SVM, Predictive Modeling, Train-Test Split
- **Office Software:** Salesforce & Delphi CRM, Compass, Microsoft Office Suite (Word, Excel, PowerPoint, etc.)

EXPERIENCE

DoorDash & UberEATS – Los Angeles, CA

February 2023 – Present

Courier Specialist (Independent Contractor)

- Qualified for “Top Dasher” and “Large Order Program” tiers by consistently exceeding key performance thresholds in acceptance rate, completion rate, and customer satisfaction
- Delivered 2,000+ customer orders while maintaining 100% fulfillment accuracy and a 4.98/5.0 satisfaction score; self-managed order routing, performance tracking, and optimized real-time decision-making
- Earned a 4.98 customer satisfaction rate whilst receiving in-app compliments: “Friendly Service” & “Quick and Efficient” 40 times, “Delivered with Care” 30 times

PROJECTS

Tata Consulting Group Retail Analytics | [Dashboard](#)

June 2025 – June 2025

- Transformed 500K+ rows of transactional data in Power BI using Power Query to apply quality filters, date formatting for time-series analysis, and prepare a clean dataset of 379K records for C-level decision-making made possible by nondestructive removal of duplicate records
- Presented to simulated CEO and CMO insights to inquiries in a 5-minute presentation, showcasing recent revenue trends, customer segmentation, and top non-UK markets – highlighting a 76.5% Q4 revenue rally and positioning the Netherlands and EIRE for strategic expansion

British Airways Sales Conversions ML Modeling | [GitHub](#)

April 2025 – June 2025

- Analyzed 50,000 airline booking records using Python to identify key factors driving a low-converting e-commerce sales funnel (15% conversion) through a combination of statistical analysis and Random Forest modeling; delivered executive-facing dashboard with actionable insights to inform marketing optimization
- Developed exploratory data visualizations in Python applying pandas, matplotlib, and scikit-learn to identify KPIs driving booking patterns within customer data for British Airways and improving predictions 225%

Healthcare Analysis Report with Predictive Modeling | [GitHub](#)

March 2025 – April 2025

- Analyzed 1,027 ICU research patient records in Excel using descriptive statistics, frequency tables, uncovering 78.7% of patients are discharged, and although with high variability, average ICU stay was 11 days
- Evaluated hospital stay prediction model with linear regression which resulted in a poor fit of 0.021 (R^2), then transitioned to logistic regression with Excel Solver to model mortality, producing a 74.7% outcome score during for a high-risk scenario analysis

CERTIFICATION

Data Science Professional – IBM

Data Science Math Skills – Duke University
