WORK EXPERIENCE

UX Research Assistant | Meta | New York, NY

2023-2025

- Moderated usability testing sessions for a next-gen sEMG wrist interface over 4 product cycles, focusing on gesture interactions and onboarding flows.
- Collaborated cross-functionally with designers, PMs, and engineers to translate research insights into actionable design recommendations, driving a 60%+ reduction in user confusion.
- Collected and synthesized qualitative and quantitative data (task metrics, error logs, surveys), identifying critical usability barriers and informing design iterations.
- Supported heuristic evaluations and cognitive walkthroughs that enhanced interface clarity and improved in-session guidance.

UX Research Intern | In-House | Brooklyn, NY

2022-2023

- Conducted 15+ user interviews to uncover pain points, leading to creation of 4 detailed user personas that directly shaped product strategy and design.
- Redesigned survey instruments and messaging, boosting response rates by 50%, and increasing the reliability of user feedback data.
- Synthesized user research insights and tracked KPIs to inform data-driven product decisions and prioritize design improvements.

Lab Assistant | SEAH Lab | Glassboro, NJ

2020-2021

- Completed comprehensive literature reviews on anxiety and depression comorbidities in Autism Spectrum Disorder, synthesizing insights to inform research directions.
- Applied mixed methods research to investigate emotional health in neurodivergent populations, combining qualitative and quantitative analysis techniques.
- Performed statistical analyses (ANOVA, inferential tests) to identify significant behavioral patterns, guiding potential intervention strategies.

PROJECTS

Usability Evaluation | Uniqlo.com

2024

- Conducted a heuristic evaluation and cognitive walkthrough to identify usability issues in navigation, search, and information architecture.
- Planned and moderated a usability test to assess task completion and user satisfaction with key site functions.
- Provided design recommendations to improve overall user experience and site usability.

EDUCATION

DePaul University | Chicago, IL

2023 - 2026

Human Computer Interaction, Master of Science

Rowan University | Glassboro, NJ

2019 - 2021

Psychology, Bachelor of Science

SKILLS & TOOLS

Research Methods: Wireframing, Card Sorting, Usability Testing, User Interviews, Heuristic Evaluation

Tools: Google Analytics, SPSS, Qualtrics, R, Figma, Axure, Jira, Excel (Macros, VBA)
