Procurement : Analyzed purchasing trends to identify cost-saving opportunities and support strategic sourcing decisions. Oversaw procurement operations by monitoring vendor performance and ensuring alignment with organizational goals.

Master Data Management: Maintained and updated critical supply chain data, including Mfg#, price, Supplier number, UOM and more, ensuring accuracy and compliance across hospital systems.

Problem Solving :Skilled at analyzing root causes of complex challenges and developing innovative, lasting solutions. Proven ability to streamline processes, resolve issues efficiently, and drive positive outcomes.

PROFESSIONAL CAREER EXPERIENCE AND ACCOMPLISHMENTS

Supply Chain Data & Procurement Analyst • Sharp Healthcare, Remote **02/2025 - 08/2025(6 month contract)**

- Led master data management initiatives using GHX and Looker, improving supplier data accuracy and reducing procurement discrepancies by 20%.
- Maintained and audited purchase catalog and MMIS master data to ensure compliance with hospital policies, regulatory standards, and GPO contracts.
- Analyzed and tracked Purchase Orders, Back orders, Rejections and Discontinuations in Workday and Excel, ensuring minimal disruption to medical operations and optimal resource allocation and DEDs
- Partnered cross-functionally with procurement, clinical, and finance teams to optimize contract compliance and inventory management, driving measurable cost savings.
- Developed and implemented data validation processes leveraging Excel macros and pivot tables to streamline reporting and enhance decision-making accuracy.
- Managed resolution of complex procurement issues by collaborating with suppliers, manufacturers, and internal stakeholders, improving operational efficiency.
- Supported strategic sourcing efforts by analyzing purchasing trends and vendor performance to identify cost reduction opportunities and supplier risks.

- Analyzed and tracked deployment metrics for 500+ computers during migration to the EPIC EHR system, ensuring minimal disruption to medical operations and optimal resource allocation
- Monitored and evaluated data to identify trends and resolve bottlenecks, ensuring seamless IT support for 500+ users accessing critical healthcare applications.
- Manage logistics of Memorial Hermann warehouse used to store all equipment migrated to EPIC platform
- Developed and maintained data models by studying KPIs to optimize business operations, improve healthcare IT workflows, and enhance system performance.
- Generated real-time dashboards and reports using Microsoft Excel, SQL, and Oracle to track progress of IT projects, enabling proactive decision-making and timely delivery
- Coordinated data-driven planning and execution of key IT initiatives, including system upgrades, installations, and software migrations, ensuring projects were completed on time and within budget.
- Coordinated IT operations, overseeing system maintenance, troubleshooting hardware failures, and managing incoming support requests to maximize uptime.
- Analyzed support request trends to streamline troubleshooting processes and improve response times, maintaining system uptime and user satisfaction.
- Provided data insights to guide training programs on software applications and IT security best practices, increasing end-user proficiency and reducing security risks.
- Use of Servicenow to receive, track and send shipments of multiple devices including desktops, laptops, scanners etc. as well as communicate with shippers.

- Lead a pivotal logistical segment at Amazon, ensuring the fulfillment of same-day delivery commitments by utilizing SQL, SAP, and Microsoft Excel to extract and analyze essential metrics
- Tracked purchase orders and requisitions during Procure-to-pay process, utilizing KPIs to improve results
- Utilized multiple KPIs to monitor and evaluate third-party vendor and third party logistics provider performance, identifying cost-saving opportunities and reducing expenses
- Pull data from numerous databases (using Excel, SAP, SQL and/or other data management systems) and to perform ad hoc reporting and analysis.
- Identify and promptly resolve 70+ potential obstacles per day that could impede same-day delivery promise
- Facilitate flow of information between different stakeholders (Transportation Carriers/Hubs/Warehouses) and swiftly resolve any potential issues that impact customer experience and business continuity
- Assist over 100 third-party dispatchers, Amazon Associates, and Amazon truck drivers daily, courteously providing resolutions to any issue that might arise during freight delivery operations
- Analyzed and understood the business impact of trends to make decisions based on available data.
- Assist over 100 third-party dispatchers, Amazon Associates, and Amazon truck drivers daily, courteously providing resolutions to any issue that might arise during freight delivery operations
- Systematically escalate problems or variance in the information and data to the relevant owners and teams and diligently track resolutions to ensure problems are solved
- Work within various time constraints to meet critical same-day delivery commitments, while measuring and operational activities performed
