Public Health Data Analyst

- **Analytic toolkit:** Experienced SAS, Microsoft Office, novice SQL, novice GIS spatial analysis, disease surveillance data management
 - **Diverse research experience:** Study design involving intersection of HIV and COVID-19 in Kenya, kidney disease in dialysis patients, and opioid use disorder
 - **Strong interpersonal and organizational skills:** Conducted up to 200 outreach events and powerpoint and poster presentations from data analysis results.
-

Education

Columbia University, Mailman School of Public Health, New York, NY
Master of Public Health, Epidemiology, Certificate in Infectious Disease

Graduated: May 2021

GPA: 3.73

Thesis: Comparing Demographic and Socioeconomic Predictors Associated with Vaccine Intent and Uptake in the 2009-2010 H1N1 Influenza Pandemic and the COVID-19 Pandemic

University of California, Irvine, Irvine, CA
Bachelor of Science in Public Health

Graduated: June 2018

Professional Experience

New York City Department of Health and Mental Hygiene, COVID-19 Data Unit, New York, NY
Respiratory Disease Analyst

August 2022 – Current

Conducting respiratory disease surveillance data analysis, management, and research in New York City.

- Performing routine management and QA of COVID-19 surveillance laboratory and case data using SAS.
- Maintaining and writing code for routine RSV, FLU, and COVID-19 surveillance reports prepared for internal and external stakeholders.
- Conducted a descriptive analysis of COVID-19 deaths classified under former and revised surveillance definitions; abstract and poster results presented at 2023 NYCEF Conference in New York; publication pending at Journal of Public Health Management and Practice.
- Conducting a descriptive analysis of COVID-19 early reinfections; abstract and poster results presented at 2025 NYCEF Conference in New York.

Los Angeles Department of Health, COVID-19 Death Surveillance Team, Los Angeles, CA
Epidemiology Analyst

June 2021 – June 2022

Contributed to COVID-19 and Influenza death surveillance efforts in the Los Angeles County Area.

- Maintained and wrote SAS programs for routine data reports prepared for internal and external stakeholders.
- Performed routine management, cleaning, and QA of COVID-19 surveillance data using SAS.
- Conducted descriptive analysis of comorbid conditions of COVID-19 deaths by vaccination status in Los Angeles County and presented results in Epidemiology and Data department-wide meeting.

UC Irvine Medical Center, Dept. of Nephrology, Orange, CA
Research Assistant

April 2018 - June 2018

Conducted statistical study to investigate the relationship between albumin/globulin ratios and mortality in hemodialysis patients.

- Performed statistical analysis and data management using hemodialysis patient data (cohort size= 144,164) including descriptive analysis, logistic regression, survival analysis, and spline models using SAS.
- Completed abstract and contributed to manuscript development; poster presented at the American Society of Nephrology Kidney Week 2018 in San Diego, CA.

Rebuilding Together Silicon Valley, San Jose, CA
Americorps Outreach Coordinator

August 2018 - June 2019

Expanded relationships with partnering organizations and program awareness through outreach and volunteer coordinating.

- Developed and maintained approximately 150 community partnerships with organizations and community centers.
- Organized and led roughly 200 outreach events presenting to large audiences, tabling at resource fairs, and social media posting.
- Assisted with volunteer coordinating through 3 major rebuilding events, each hosting roughly 750 volunteers at once.
- Conducted quantitative analysis using survey data to evaluate the impact of organization's 25 services. Presented findings to staff and board members.
