SUMMARY

Data Analyst with 4 years of experience across commercial banking, financial compliance, and healthcare systems. Proficient in managing 10M+ records using SQL, Python, SAS, and Snowflake. Expert in Risk Management, delivering automated reporting and insights to board-level stakeholders. Skilled in ETL optimization, data mining, and creating 30+ interactive dashboards for executive decision-making. Strong focus on schema reconciliation, KPI mapping, and technical documentation for regulatory audits.

PROFESSIONAL EXPERIENCE

Commercial Data & Insights Analyst II | Huntington National Bank | OH, USA

Nov 2025 – March 2026

- Orchestrated 4 critical risk management projects using SAS and Snowflake to bolster internal controls for commercial business units.
- Automated 9 monthly executive-level reports within Azure DevOps, presenting customer behavior and metrics to board members.
- Engineered complex data mining and validation workflows across multiple systems to ensure data integrity for commercial banking.
- Directed a governance audit for commercial loan approvals; developed a reporting suite to verify adherence to delegated authority limits, ensuring 100% alignment with internal risk policies.
- Streamlined data synchronization between Salesforce and internal databases, facilitating ad-hoc analysis of business results.

Data Analyst | BNY Mellon | Remote, USA

March 2025 – Oct 2025

- Built regulatory audit reports using advanced SQL and PostgreSQL on 2M+ records, improving accuracy for monthly filings.
- Automated data quality checks with Python across 4 ingestion pipelines, reducing manual validation by 6 hours weekly.
- Created Power BI dashboards to visualize asset classes and risk indicators, supporting 20+ executives with real-time analytics.
- Streamlined ETL workflows using Apache Spark and Databricks to integrate structured and unstructured financial data.
- Resolved pipeline failures by analyzing Spark logs and fixing 50+ transformation errors while maintaining documentation for 15 pipelines.

Data Analyst | KPMG | India

Oct 2020 – Nov 2022

- Developed 12 modular SQL procedures to consolidate compliance and finance data from 6 departments for quarterly audit preparation.
- Visualized operational metrics in Tableau and Power BI by building 4 audit dashboards, guiding 3 strategic reviews with leadership.
- Refined ETL pipelines using Informatica and Python, accelerating batch processing and reducing error logs for 8 business units.
- Standardized 20+ KPIs across cross-functional teams, ensuring consistent metric definitions in 5 recurring reports.
- Resolved 10+ ETL issues tracked via Informatica Monitor by diagnosing transformation failures and restoring critical audit flow.

Data Analyst Intern | Cipla | India

March 2020 – Sept 2020

- Engineered 10+ SQL test cases to validate pharmaceutical and prescription data integrity for regulatory filings.
- Diagnosed 5 recurring transformation issues by profiling batch logs with Python, reducing inconsistencies in clinical reports.
- Recorded 120+ data discrepancies via JIRA and coordinated with QA to shorten anomaly resolution cycles.
- Audited API data syncs across 3 internal systems, verifying schema alignment and preventing record mismatches in production.
- Delivered dashboard walkthroughs and data verification SOPs to 2 junior analysts, expediting readiness for 2 regulatory cycles.

PROJECTS

- Commercial Loan Governance Audit (Huntington):** Partnered with business units to build a control-validation logic in Snowflake; engineered technical documentation and automated reporting to verify that loan approvers stayed within authorized financial limits.
- Regulatory Audit Dashboard (BNY Mellon):** Built a reporting suite using Power BI and SQL to visualize audit metrics from 2M+ transaction records, streamlining monthly compliance reviews for finance teams.
- ETL Optimization for Compliance(KPMG):** Optimized data ingestion logic across 10+ enterprise systems using Apache Spark and Databricks, accelerating batch processing and increasing reliability in regulatory data pipelines.
- Clinical Data Validation Tool (Cipla):** Developed SQL scripts and Python-based reconciliation logic to validate 10+ clinical datasets, ensuring accuracy for approval documentation and eliminating batch inconsistencies.

TECHNICAL SKILLS

Programming: Python (Pandas, NumPy), SQL (Snowflake, PostgreSQL, Oracle, CTEs), SAS, Bash

Databases & Cloud: Snowflake, Azure DevOps, MongoDB, NoSQL, Oracle, SQL Server, Databricks

Data Engineering: Apache Spark, Informatica, ETL Pipelines, Data Validation, Salesforce Integration

Analytics: Tableau, Power BI, Anomaly Detection, KPI Mapping, Data Profiling, Risk Management

Workflow: JIRA, Git, Confluence, Agile Framework, Technical Documentation

EDUCATION

Master of Science in Computer Science

Jan 2023 – Dec 2024

University of Dayton | Dayton, OH, USA
