DATA ANALYSIS PROJECTS

Create Charts and Dashboards Using Microsoft Excel [\[LINK\]](#) Coursera **04/2025**

- Utilized PivotTables, bar graphs, slicers, and conditional formatting to organize and present complex datasets, enabling efficient data analysis and trend identification within the course projects.
- Leveraged sales data to create dynamic visualizations, including monthly sales trends, salesperson performance, and sales percentages
- Designed an intuitive dashboard that provides real-time access to critical sales information, enhancing data accessibility and facilitating informed decision making for cross-functional teams

Data Analytics Capstone Project [\[LINK\]](#) • Google Data Analytics Professional Certificate **04/2025**

- Imported 12 Excel datasheets with millions of entries into R, then used tidyr package to clean the datasets and prepare them for analysis
- Joined all of the datasets together, created subsets of the data, and converted each attribute to the proper data type before performing analysis to find differences between members and casual customers
- Developed visuals using the ggplot2 package to display the analysis results and provide meaningful conclusions for stakeholders to implement

EDUCATION, CERTIFICATES, & CERTIFICATIONS

Bachelor of Science in Data Analytics – Western Governors University **Expected**
08/2025

- Gained hands-on experience in SQL, Python, R, data wrangling, statistical analysis, and visualization through real-world projects and a final capstone.
- Earned industry-recognized certifications (CompTIA Data+, AWS Cloud Practitioner, Udacity Data Analyst Nanodegree) embedded in the program.
- Applied data storytelling, business communication, and machine learning to deliver actionable insights and support data-driven decisions.

Google Data Analytics Certificate • Merit America, Virtual **07/2025**

- Cultivated skills in the collection, transformation, organization, and visualization of data in order to draw conclusions, make predictions, and drive informed decision-making
- Completed hands-on labs and a capstone project (case study) to master the art and science of asking questions, preparing, processing, analyzing, visualizing, and acting on data as encountered in real-world scenarios
- Collaborated with training cohort to gain proficiency in team-based project management, task prioritization, problem-solving, and frequent use of Google Workspace tools

PROFESSIONAL EXPERIENCE
