(585) 831-8112 | currantejwani@gmail.com | **LinkedIn:** [currantejwani](#) | **Github:** [currantejwani](#) | **TryHackMe:** [currantejwani](#)

Motivated and detail-oriented cybersecurity professional with a Master's in Cybersecurity from the Rochester Institute of Technology and a strong software and computer science background. Seeking a Security Engineer - Incident Response, SOC Analyst position to leverage my expertise in incident handling, threat analysis, and security operations to enhance organizational security posture.

EDUCATION

Rochester Institute of Technology, Rochester, NY | Aug 2022 - May 2024

Masters in Cybersecurity; *GPA: 3.97*

Jaypee Institute of Information Technology, Noida, India | Aug 2018 - May 2022

Bachelor of Computer Science

CERTIFICATIONS

- CompTIA Network+, CompTIA Security+, eJPT, AWS Certified Cloud Practitioner, AZ-900

WORK EXPERIENCE

Information Technology Intern | Roswell Park Comprehensive Cancer Center, Buffalo, NY | May 2023 - Aug 2023

- Revolutionized the user experience of a Flutter-based mobile app by deploying new features; increased user engagement by 30%.
- Revamped CI/CD processes, trimming deployment duration by 35% and cutting integration failures by 20%, thereby streamlining the rollout of new functionalities.
- Implemented **biometric authentication** for secure handling of medical data, enhancing data security protocols.
- Enhanced the Patient Portal's sign-in interface, reducing login time by 40% and enhancing user navigation efficiency.

Software Engineer | Sunstone, Gurugram, India | Mar 2022 – Jul 2022

- Developed and maintained secure Flutter-based mobile applications for Android and iOS platforms, ensuring high performance.
- Identified and mitigated a **Broken Object Level Authorization (BOLA) vulnerability** in one of the API endpoints, enhancing the application's security posture.
- Teamed up and collaborated with the development team to enforce best practices and maintain high standards of code quality through thorough code reviews.

KEY PROJECTS

SOC Simulation Project

- **Project Overview:** Engineered a corporate network utilizing an active directory structure on the ESXi bare metal hypervisor.
- Integrated security monitoring tools such as Splunk, IDS/IPS, and firewall, ensuring alignment with industry-standard network monitoring practices.
- Executed thorough penetration testing on the network infrastructure, identifying and recording security weaknesses.

Reverse Engineering: Comprehensive Malware Analysis

- **Project Overview:** Engaged in a reverse engineering project focused on deconstructing and analyzing a specific piece of malware, to understand its structure, functionality, and impact.
- Analyzed malware using strings and PEview to extract critical data pre-execution; achieved a 50% reduction in analysis time.
- Employed tools such as IDA Pro and OllyDbg for an in-depth examination of the malware's code.

Scripting Across Platforms: Bash, PowerShell, and Python

- **Project Overview:** Developed diverse scripts using Bash, PowerShell, and Python to automate and streamline various tasks.
- Created a suite of tools including a website crawler, key loggers, backdoors, malware, and an ARP spoofer, showcasing versatility across different scripting languages.

Homomorphic Encryption Implementation (Cryptography)

- **Project Overview:** Implemented advanced homomorphic encryption techniques to facilitate secure data processing, enabling computations on encrypted data without the need for decryption. Applied Kluczniak and Schild's FHE scheme with bootstrapping.
- Identified potential areas for future research in the field of cryptography and homomorphic encryption.

SKILLS

- **Programming Languages:** Python, C, C++, Java, JavaScript, Shell Scripting, Dart
- **Technical Tools:** Splunk, Elasticsearch, Logstash, Kibana (ELK Stack), Nmap, Wireshark, Metasploit, Nessus, OWASP Zap, BurpSuite, Snort, Suricata, The Hive, MISP, IDA Pro, OllyDbg, Ghidra, VMware, EC2, Palo Alto Networks Cortex XDR
- **Cloud Computing:** AWS, Azure, Google Cloud, IAM, WAF, KMS, HSM, DDoS Protection
- **Cybersecurity Standards:** MITRE ATT&CK Framework, CIS Controls, NIST Special Publication 800 series, ISO/IEC 27001, and OWASP Top Ten.
- **CORE COMPETENCIES:** Threat Detection and Response, Security Information and Event Management (SIEM), Incident Analysis and Documentation, Network Security, Threat Intelligence, Malware Analysis, Vulnerability Assessment and Penetration Testing (VAPT), Cloud Security, Application Security.
