EXPERIENCE

Software Engineer

LTI Mindtree – India

December 2023 – July 2024.

- **Developed and enhanced** key components utilizing .NET Framework to improve functionality and efficiency.
- Implemented responsive and user-friendly UI designs using **Angular and TypeScript**, significantly improving the overall user experience and satisfaction.
- Optimized SQL queries and database interactions leading to a reduction in data retrieval times and **improved performance**.
- **Collaborated** with cross-functional teams to gather requirements and translate them into technical solutions ensuring alignment with business objective.

Internships:

Trainee Intern

LTI Mindtree - India

Feb 2023 – April 2023

- Accomplished in self-paced learning modules and actively participated in daily practice tests to enhance technical knowledge and skills.
- Benefited from weekly mentoring sessions, receiving guidance and feedback from experienced professionals
- Demonstrated **consistent progress and performance** through weekly assessments, showcasing adaptability and commitment to continuous learning

Mobile App Developer Intern

Simba Developers – India

July 2022 - December 2022

- Developed a **multi-platform mobile application** (iOS / Android) using Flutter within 6 months duration.
- Reduced the time required for user authentication and increasing retention rate by **16%**.
- Incorporated Firebase analytics to track user engagement and **gained over 40K downloads**.

PROJECTS

Event Management System

- Led full-stack development of a Corporate Events Management Portal using Angular 10, ASP.NET Core and SQL Server integrating role-based authentication and **JWT** for secure user management.
- Developed and integrated robust **API endpoints using ASP.NET Core Web API**, ensuring secure and efficient data handling and interactions between the front end and back end.
- Applied **OWASP security practices** to safeguard the application against vulnerabilities such as SQL injection and broken authentication, ensuring data integrity and user protection.
- Optimized performance **with Entity Framework Core** for efficient database operations and data consistency.

Heart Disease Prediction

- Built and developed a **Machine Learning model** for predicting heart disease in patients.
- **Achieved 87.7% accuracy** in prediction models and outperformed national baseline by 15.2%.
- Thoroughly executed model evaluation and analysis, pinpointing crucial features that significantly contributed to heart disease prediction.

EDUCATION

Masters of Science – Computer Science

State University of New York at **Binghamton** • Binghamton, USA

Aug 2024- present

Bachelor of Technology in Computer Science

MIT World Peace University • Pune, India • 8.71/10 GPA

July 2019- July 2023

Intermediate(XII)

Dream Land Public School • Jammu • 84.2%

April 2018- April 2019

SKILLS

Languages: C, C++, C#, Flutter, Python, Java, JavaScript, React, Angular, Typescript

Database: SQL, MongoDB

Backend: Firebase, Node.js
