---

### **SUMMARY**

Life sciences professional with 6+ years of cross-functional experience in scientific project delivery, molecular diagnostics, and research operations. Proven track record leading regulated projects in translational medicine, microbiology, and clinical data environments. Adept at stakeholder engagement, scope definition, SOP-aligned implementation, and scientific communication across global teams. Currently pursuing an MS in Biotechnology and transitioning into consulting roles supporting regulatory strategy, pharmacovigilance operations, and clinical development process improvement. Fully authorized for work.

---

### **WORK EXPERIENCE**

#### **Antimicrobial Discovery Center (Northeastern University)**

##### **Sr Research Technician**

<https://lewislab.sites.northeastern.edu/>

May 2023 - April 2025

- Led delivery of molecular biology workflows supporting infectious disease research and translational pharmacology.
- Coordinated cloning, IVT, and RNA preparation processes under GLP-aligned protocols.
- Supported cross-team collaboration, documentation, and training for experimental compliance in regulated lab settings.
- Acted as liaison between scientific leadership and technical teams to resolve project delays and methodological discrepancies.

#### **Genomed**

##### **Agricultural biotechnology project manager**

<https://genomed.ru/>

<https://sesana.ru>

Aug 2021 - Oct 2022

- Owned delivery of sequencing-based projects in agricultural genomics under evolving logistical and geopolitical constraints.
- Defined project scope, aligned internal and external stakeholders, and ensured adherence to regulatory SOPs.
- Acted as scientific advisor to clients and vendors on strategy, risk mitigation, and data validation.
- Delivered reporting packages and participated in knowledge-sharing presentations with partner institutions.

#### **Biocontrol**

##### **Assistant (small animal oncology department) / Clinical data analyst**

<https://www.biocontrol.ru/>

June 2016 — Jan 2019

- Supported small animal oncology programs with a strong emphasis on treatment compliance and medical data accuracy.
- Managed coordination of clinical records, client-facing communications, and cross-team scheduling.
- Maintained high-quality patient documentation used for protocol refinement and quality audits.

---

**MSU Lab****Microbiology Lab Technician**

<https://www.msulab.ru/>

Apr 2013 – Oct 2014

- BSL2, preparing media solutions, autoclaving, preparing microbiological samples for analysis, accounting and registration of water samples for research, calculation of research results, maintaining laboratory records.

**EDUCATION****Peoples' Friendship University of Russia**

2011 — 2016

Doctor of Veterinary Medicine (DVM degree)

**Northeastern University**

2024 — 2027

MS Biotechnology

**LANGUAGES**

English (Fluent), Russian (Fluent), Spanish (Intermediate), Azerbaijani (Intermediate)

**TECHNICAL SKILLS**

Consulting & Client Delivery • Clinical Development Operations • Cross-functional Collaboration • SOP & Quality Systems • Regulatory Process Familiarity • Stakeholder Engagement • Molecular Diagnostics Strategy • Scientific Documentation • Workshop Facilitation • Project Scoping & Implementation • Life Science Communication • Data Integrity & Risk Management

**SOFT SKILLS**

Analytical thinking – Quick identification of patterns and inconsistencies; informed decision-making.  
Situational assessment – Accurate judgment under pressure; prioritization in dynamic environments.  
Resilience & adaptability – Stable performance in high-stress, uncertain, or changing conditions.  
Strategic communication – Clear, assertive interaction across multidisciplinary teams.  
Problem solving – Proactive approach to conflict, error resolution, and system inefficiencies.  
Accountability & integrity – Strong sense of responsibility and reliability in sensitive contexts.

**ADDITIONAL INFORMATION**

US Permanent Resident (Green Card holder). Fully authorized to work in the US.
