

KAVYA J

Full Stack Developer

Missouri, USA | (201) 497-0777 | kavya.j3099@gmail.com

PROFESSIONAL SUMMARY

- A Technocrat 4+ years of IT experience in the areas of Analysis, Design, Development, Production Support and Deployment of Web based applications using Object Oriented Concepts, **Java and J2EE, Web Services (SOAP, REST APIs, WSDL), JavaScript, AWS, JDBC, Servlets, Struts, Jenkins, AJAX, HTML, XML and JMS.**
- Experience in using **React's Components, Forms Events, Key, Router, plus Redux, Animations and Flux Concept.** Experience with **AWS Lambda function, Auto scaling, SQS.**
- Experience in developing applications using **Java/J2EE(Servlets, JSP custom tags, Struts, Spring, Hibernate, EJBs, Java Beans, JDBC, JMS, JSF), XML, Bamboo, JavaScript, HTML, Hibernate, Eclipse3.x, Tomcat6/7/8.0, WebLogic, Oracle and Unix Korn Shell Scripting.**
- Experienced Implementing **MicroServices.** We had worked in an Enterprise Application where we had to implement microservices in order to separate the tasks and not to have dependency on other Parallel on-going tasks of same Application.
- Knowledge on **Build tool Jenkins** with configuring check styles, Test coverage.
- Developed **ANT** scripts to build and deploy the application in the **JBOSS** Application Server. Extensive experience in testing on multiple operating systems including **Linux, Unix, Sun Solaris, and Windows.**
- Strong experience on various version control systems like **Git, GitHub, CVS and SVN.**
- Experience in developing, deploying, and managing **N-tier, server-centric J2EE** enterprise class projects using **Eclipse IDE 3.x/4.x, My Eclipse 6.5, J2SE1.4/1.5/1.6 (Java 2, Applets, Swing, JDBC 3.0, RMI), J2EE 1.5** Web application technologies (**Servlets 2.x, JSP 1.x/2.x, JSTL 1.2, JSF 1.x, JNDI**), Enterprise application technologies (**EJB 2.x/3.0, JMS.** Extensive experience in developing scalable, reliable, efficient web and enterprise applications using **JSP, Servlets, Struts, JSF (Prime Faces).**
- Proficient in using **Spring** (transaction support modules and JPA), **Spring JDBC** (for transferring data to database). Experience in using Web/Application servers like **WebLogic, JBoss, Glassfish and Tomcat.**
- Hands-on experience with **SQL and NoSQL databases** including Oracle, PL/SQL, SQL Server, PostgreSQL, and MongoDB, with strong skills in query optimization and data modeling.
- Very good experience in developing Test Cases using **JUnit.** Involved in wrap-up meetings and in estimating the timeframe for each story and helped in deploying the application on the server for every iteration of agile software development.
- Strong knowledge and hands-on experience of deploying applications using **Kubernetes,** cloud native application development, pivotal cloud foundry, **JavaScript, Kendo UI, Java/J2EE technologies & RDBMS.** Expert level skills on **Angular, CSS3, HTML5, Node JS, jQuery, JavaScript, React, AJAX, JSON, Tag Libraries.**
- Strong Relational Database Management System (RDBMS) principles and extensively worked with **Oracle, PL/SQL, SQL Server & DB2.** Good understanding on **Microservices** architecture and **SOA.** Good knowledge on application of **Spring Cloud-Netflix OSS** for **Microservices** deployment

SKILLS

Languages: Java, C, C++, C#, J2EE, SQL

Platforms: Windows7, Windows XP, Windows Server2003, LINUX, UNIX, Mac

Frameworks: Spring, Hibernate, Spring-core, Spring MVC, Spring Webservices

J2SE/ J2EE Technologies: Java, J2EE, JDBC, Servlets, JMS, Web Services.

Web Technologies: HTML, HTML5, CSS, JavaScript, ReactJS, Angular

Web Services: Spring Webservices, SOAP, and REST

Web/App Servers: WebSphere5.1/6.0, WebLogic Application server, JBOSS, J2EE Server1.4, Apache Tomcat 4.1/5.1, Spring Boot, IBM HTTP Server.

Tools and API's: JIRA, SQL Developer, Maven, JBoss Hibernate Tools, and JBoss Web tools, Log4J, JUnit, Pega

Databases: SQL Server, MySQL, MongoDB, Oracle.

Cloud Tools: AWS, Azure, GCP

Build Tools, Repositories, and IDE: Tomcat, IBM WebSphere, Maven, Docker, DevOps tools, CI/CD with Jenkins, GIT, IntelliJ, Eclipse, and Spring Tool Suite.

EXPERIENCE

Anheuser-Busch, Full Stack Developer | (St. Louis, Missouri)

Feb 2025 – Present

Anheuser-Busch is an iconic American brewing company. Design, develop, and maintain web applications using Java/J2EE technologies. Implement front-end interfaces with frameworks like Angular or EXTJS. Integrate various software components and third-party services to enhance application functionality.

- Designed and deployed **REST APIs** using **Java 8, J2EE (JSP, Servlets, JDBC, EJB), Spring Boot, and Hibernate**, enabling seamless partner integrations and reducing data exchange latency by 25%.
- Implemented **Spring Cloud Netflix OSS (Eureka, Ribbon, Circuit Breaker)** for service discovery, client-side load balancing, and fault tolerance across distributed microservices.
- Built event-driven systems with **Apache Kafka** and **JMS**, supporting asynchronous communication for high-volume financial transactions.
- Engineered multi-cloud deployments on **AWS (Lambda, EC2, S3, Cloud Management tools), GCP, and PCF/OpenShift**, ensuring portability and resilience across environments.
- Designed and scaled a **multi-rack Cassandra cluster** and integrated **CockroachDB, Oracle, MySQL, PostgreSQL, and MongoDB**, tuning queries and stored procedures for high throughput.
- Developed middleware workflows with **Apache Camel routes, JMS endpoints, and FreeMarker templates**, streamlining backend integrations and API responses.
- Architected and containerized **microservices** with **Spring Boot** and **Docker**, decoupling monolithic modules into independent, scalable services that improved parallel development and reduced deployment failures.
- Optimized large-scale data pipelines by transforming **Hive/SQL queries into Spark (RDD, Scala) jobs**, cutting batch processing times by 30%.
- Designed and scaled **SQL/NoSQL** databases including **Cassandra, CockroachDB, Oracle, MySQL, PostgreSQL, and MongoDB**; optimized queries, indexes, and stored procedures for high throughput and low latency.
- Delivered modern front-ends using **AngularJS, Angular 8+** (with Angular Material, RxJS, NgRx for state management), React (with Redux and React Hooks), and Vue.js, applying Material UI and Vuex to build reusable, responsive, and accessible UI components. Automated deployments with **Jenkins + Gradle**, provisioning infrastructure with **Chef**, and orchestrating workloads via **Kubernetes clusters** for zero-downtime releases.
- Secured enterprise applications with **Spring Security, OAuth2, and JWT**, ensuring compliance with authentication/authorization standards.
- Built automated acceptance and UI testing frameworks using **Cucumber BDD, JUnit, Jest, Jasmine, Karma, Cypress, and Selenium**, achieving 90% test coverage.
- Deployed and managed scalable applications on **WebLogic Application Server**, integrating **SOA and SOAP services** and validating APIs with **SoapUI**.
- Developed Python-based ETL pipelines for **terabyte-scale daily data processing**, achieving 99.9% accuracy in reporting and analytics.
- Collaborated in Agile/Scrum sprints using **JIRA** for backlog management, peer reviews, and cross-team coordination to deliver high-quality features on time.

Federal Reserve Bank of Kansas City, Full Stack Developer |(Kansas City, Missouri)

Mar 2024 - Jan 2025

The Federal Reserve acts as the U.S. central bank, it is maintaining an effective, reliable payment system; supervising and regulating bank operations; and establishing monetary policies. As a Java Full Stack Developer i am responsible for designing, developing, and maintaining software solutions that meet business requirements. It involves managing the full software development lifecycle, including testing, implementation, and auditing.

- Designed and deployed **cloud-native applications** on **AWS (EC2, S3, Lambda)**, **Azure ARM (security, auditing, tagging, Functions)**, and **GCP**, strengthening compliance and scalability across hybrid infrastructure.
- Built and maintained enterprise-grade services using **Java/J2EE (JSP, Servlets, EJB, JNDI, JTA, JDBC)** and **Core Java (multithreading, collections, exception handling, I/O)** to deliver secure, high-performance banking modules.
- Developed scalable **Spring Batch microservices** secured with **Spring Security (OAuth2, JWT)**, improving data isolation and reducing batch execution time by 20%.
- Implemented **Apache Kafka** and **JMS** for event-driven processing, asynchronous messaging, and real-time payment status notifications, increasing system throughput by 30%.
- Architected and deployed microservices-based solutions using **Spring Boot**, **Spring Cloud**, and **Docker** containers, decoupling monolithic modules into independent services and enabling faster, parallel development across teams.
- Engineered **REST APIs and service integrations** with **Java 8 (Streams API, Lambdas)**, **Apache Camel**, **Play Framework**, and **Akka**, enabling seamless inter-system communication.
- Designed hybrid database solutions leveraging both **SQL** and **NoSQL** stores (**Oracle**, **MySQL**, **DB2** alongside **MongoDB** and **Cassandra**) to balance transactional integrity with horizontal scalability for analytics-heavy use cases.
- Built interactive UIs with **React.js (Hooks, Redux, Flux, Material UI)** and **Angular 8/AngularJS (NgRx)**, enhancing state management and user experience across multiple business workflows.
- Conducted POCs with the **MEAN stack (MongoDB, Express.js, Angular, Node.js)**; enhanced **Node.js/Express** APIs to integrate with partner ecosystems.
- Automated CI/CD pipelines with **Jenkins**, **Maven**, and **Gradle**; codified infrastructure with **Terraform** and **Ansible** to provision cloud resources, reducing release times by 40%.
- Configured **Hibernate ORM** for persistence across **Oracle**, **MySQL**, and **DB2** databases, tuning queries and stored procedures to optimize financial transaction reporting.
- Orchestrated **zero-downtime deployments** using **Kubernetes** and containerization via **PCF on AWS EC2**, ensuring 99.9% availability.
- Applied observability with **ELK Stack**, **Prometheus**, and **Datadog**, creating dashboards and alerts that cut mean time to resolution (MTTR) by 35%.
- Built hybrid web components with **Thymeleaf**, **HTML5**, **CSS3**, **jQuery**, **Ajax**, and **JSON**, delivering dynamic pages and supporting cross-browser compatibility.

Bharat Biotech, Java Full Stack Developer [(Hyderabad, India)

Jun 2021 - Nov 2022

Bharat Biotech International Limited (BBIL) is an Indian multinational biotechnology company. I designed and developed software solutions using Core Java and J2EE technologies. Implemented the n-tier web architectures with Java/J2EE and UI web components. Enhance user experience through effective UI design and development.

- Developed **AWS Lambda functions** to manage and automate AWS services; deployed applications on **AWS**, **Azure**, and **GCP**, optimizing performance and reducing operational cost.
- Implemented **DAO pattern with PostgreSQL/MySQL**, **Hibernate ORM**, and **JDBC**, supporting batch frameworks for scheduling jobs and ensuring efficient data persistence.
- Integrated **RabbitMQ** to decouple backend microservices and managed deployments on **JBoss (UNIX)** across staging, QA, and production environments with failover testing for high availability.
- Utilized **Node.js (Grunt, BowerJS, Express)** to streamline builds (compile, minify, concat) and integrate modules, improving delivery pipeline efficiency by 30%.
- Built **Angular (2/4) SPA components** with lazy/dynamic loading, Angular directives, and **TypeScript**, while enhancing UI with **HTML5**, **CSS3**, **JavaScript**, and **Bootstrap**.
- Wrote and executed **unit/integration tests** using **JUnit**, **Mockito**, and **TestNG**; performed **load/stress testing** with **JMeter** to validate performance under peak workloads.
- Automated CI/CD pipelines using **Jenkins**, **Maven**, **GitLab CI**, and **CircleCI**; containerized apps with **Docker** and orchestrated workloads via **Kubernetes** and **Docker Swarm**, enabling zero-downtime deployments.
- Implemented monitoring and logging solutions using **ELK Stack (Elasticsearch, Logstash, Kibana)**, **Prometheus**, and **Grafana**; built dashboards and alerts for real-time visibility.
- Managed version control with **Git**, **SVN**, and **CVS**, applying branching strategies such as **Git Flow** and **GitHub Flow** for collaborative development.
- Modernized and supported legacy systems using **Struts MVC (JSP, Servlets, Action classes)** alongside **Spring Boot microservices**, ensuring smooth migrations and maintainable architecture.
- Automated configuration of AWS nodes using **Ansible Playbooks with Python SSH wrappers**, ensuring consistency across environments.

- Used **NetBeans IDE** for Spring Boot and microservices debugging, and contributed to shell scripting and **SQL Server** validation services for backend processes.
- Participated in Agile/Scrum ceremonies using **Jira and Trello**; authored technical documentation, user guides, and API references; conducted code reviews to enforce best practices.

Spearhead Insurance Broking Pvt Ltd, Java Developer [(Hyderabad, India)

Mar 2020 - May 2021

Spearhead Insurance Broking Pvt Ltd is a Private Non-govt company. It is engaged in the Insurance Industry. Utilized the Spring Boot and Spring frameworks for back-end development. Developed and maintained the REST APIs for application integration.

- Delivered and deployed scalable enterprise applications using **Java, Spring Boot, Hibernate, and JSP/Servlets**, improving backend reliability and reducing downtime by 25%.
- Developed 25+ **RESTful services** with **Spring Boot, WADL, and Swagger**, enhancing service discoverability and reducing integration issues by 30%.
- Built modular **UI components** with **React, TypeScript, jQuery, HTML5, CSS3, and Tiles Framework**, improving reusability and front-end consistency across multiple modules.
- Automated build and deployment pipelines with **Jenkins, Maven, Nexus, and Git**, containerized applications using **Docker**, and deployed to **AWS EC2/PCF**, accelerating release cycles by 35%.
- Configured and managed **Apache SOLR** for optimized search capabilities and integrated with **Drupal CMS**, enhancing content delivery performance.
- Implemented **Kafka** and **JMS** messaging to streamline asynchronous communication, enabling real-time notifications and system alerts for business workflows.
- Created automation services to validate inputs using **Spring Validations & Bean Validations**, generating **Jasper Reports**, which reduced manual verification effort by 40%.
- Developed **SQL/PL-SQL scripts** for schema migrations and optimized queries, while leveraging **MongoDB** for handling high-volume unstructured datasets.
- Configured and tuned **WebSphere Application Server** for horizontal/vertical scaling, improving workload management and throughput by 20%.
- Practiced Agile Scrum methodology, contributing to sprints, code reviews, and continuous integration, ensuring 95% on-time deliverables.

EDUCATION

University of Missouri-Kansas City

Kansas City, MO

Master of Science in Computer Science; 3.8/4

January 2023 - December 2024

CERTIFICATION

AWS Certified Developer Associate
