## PROFESSIONAL SUMMARY

Data & Business Analyst with a Master's degree in Information Technology from Stevens Institute of Technology. Strong background in data analysis, Excel reporting, market research, and business insights generation. Hands-on experience with market basket analysis, consumer behavior analysis, and analytical reporting through academic and applied projects. Skilled in translating data findings into actionable business recommendations and supporting data-driven decision-making.

## PROJECT & ANALYTICAL EXPERIENCE

### Market Basket Analysis Project, Data / Business Analyst

- Analyzed 5,000+ transactional records to identify customer purchasing patterns using Excel and Apriori/ECLAT algorithms
- Performed data cleaning and preparation to ensure accuracy and consistency
- Identified frequent item sets and association rules to support cross-selling and product bundling strategies
- Translated technical findings into business-focused insights for improved product placement decisions
- Created structured reports summarizing key trends and recommendations

### Universoul Interactive Movie Promotion, Market Research Analyst

- Conducted demographic, behavioral, and engagement analysis to evaluate marketing campaign effectiveness
- Analyzed audience interaction data to assess reach, engagement, and conversion trends
- Supported optimization of promotional strategies through data-driven insights
- Prepared clear summaries and presentations for non-technical stakeholders

### Solar Windows Digital Innovation Project, Research Analyst

- Analyzed renewable energy and sustainability datasets related to construction materials
- Researched photovoltaic integration trends to evaluate energy-efficient building solutions
- Compared innovation approaches and documented insights to support feasibility and business evaluation
- Developed analytical documentation to communicate findings effectively

### Smart V Decors, Project Team Member

- Supported project planning and execution for digital and virtual-reality-based design solutions
- Assisted in analyzing user requirements and documenting project outcomes
- Collaborated with team members to ensure timely delivery of project objectives

## EDUCATION

**Masters in Business Analytics**, Stevens Institute of Technology, Hoboken, NJ  
GPA: 3.42/4.0

2023

**Bachelor of Business Administration**, IFHE (ICFAI Business School), Hyderabad  
Percentage: 79%

2022

## TECHNICAL SKILLS

**Data & Analytics:** Data Cleaning, Validation, and Transformation

**Exploratory Data Analysis (EDA):** Trend Analysis, KPI Tracking, Performance Metrics | Market & Business Analysis

**Tools & Technologies:** Microsoft Excel: Pivot Tables, VLOOKUP/XLOOKUP, Conditional Formatting, Reporting | SQL: SELECT, WHERE, AND/OR, basic filtering | Python (Pandas): Data loading, filtering, basic analysis | Data Visualization: Charts, summaries, basic dashboards

**Analytical Methods:** Market Basket Analysis (Apriori, ECLAT) | Consumer Behavior & Campaign Analysis | Descriptive Statistics

## CERTIFICATIONS

**Microsoft Excel for Data Analysis:** Advanced Excel functions including Pivot Tables, VLOOKUP/XLOOKUP, conditional formatting, and data cleaning | Used Excel for reporting, trend analysis, and KPI tracking in analytical projects

**Digital Marketing Analytics:** Gained hands-on exposure to campaign performance analysis, audience segmentation, and engagement metrics | Applied data-driven insights to evaluate marketing effectiveness in academic projects

**Bloomberg Marketing Concepts:** Learned fundamentals of marketing strategy, customer insights, and data-driven decision-making | Applied analytical thinking to understand market trends and consumer behavior

**SQL for Data Analysis (Foundational Training):** Practiced writing SQL queries using SELECT, WHERE, AND/OR clauses | Used SQL concepts for basic data filtering and analysis tasks

**Python for Data Analysis - Pandas (Foundational Training):** Worked with Python libraries to load, clean, and analyze structured datasets | Performed basic data manipulation and exploratory analysis using Pandas

**Business Analytics & Data Interpretation (Academic Training):** Applied descriptive statistics, data interpretation techniques, and analytical frameworks | Translated analytical findings into business-focused insights and recommendations
