Education & Certs

Bachelor of Science in Computer Science

Indiana University–Purdue University Indianapolis Aug 2020 – May 2024

Relevant Coursework: Data Structures, Database Systems (Azure Data Studio), Algorithms, Software Engineering

AZ500 Cert - Achieved on 8/15/2025

Azure Security Engineer Associate

Projects

Automated IT Asset Processing System

Python, Bash, Linux, SQLite, Git - Developed a Linux live boot environment and custom Python/Bash script to automate hardware testing and secure data wiping (NIST-800 compliant). - Processes thousands of assets per week across multiple facilities in the U.S. - Script logs data and pushes records to the company ERP database automatically using SQL. - Significantly reduced manual labor and human error while boosting throughput.

PowerShell M365 User Provisioning Tool

PowerShell, Microsoft 365, Active Directory - Created scripts to automate new user setup across Microsoft 365 Admin Center and Active Directory. - Handled license assignment, mailbox creation, group memberships, and security policies. - Reduced onboarding time from 1 hour to under 10 minutes per user.

Home Lab

I operate a high-performance home lab running Unraid, featuring 2.5GbE networking, U.2 NVMe storage, and a suite of self-hosted services including Nextcloud, Plex, Immich, and Home Assistant. Configured secure remote access using a custom domain and Cloudflare Tunnels. Utilize Docker and VMs for service isolation, automation, and continuous experimentation with modern infrastructure tools and smart home integration.

Experience

System Administrator

Moser Consulting — Indianapolis, IN | Nov 2024 – Present

Resolving 150-230 monthly Tier 1, 2, & 3 issues across 40 clients. Used PowerShell, Active Directory, and M365 Admin Centers for support and automation. Managed endpoint security, user access, and documentation via Jira and Confluence. Created automated M365 & Active Directory user creation PowerShell script that turned a long manual task in a streamlined and quick automated process.

Automation Developer – Linux & Python

ITAD Services, Inc. — Whitestown, IN | Apr 2023 – Nov 2024

Built a Linux-based live environment with automation scripts for hardware diagnostics and secure data wiping. Wrote robust logging and reporting tools to feed ERP systems. Developed internal tools used across multiple U.S. sites. Worked with enterprise servers, firewalls, and networking hardware (Cisco, Dell, HP, etc.)

IT Support Specialist

Metro T-Mobile — Indianapolis, IN | Apr 2022 – Sep 2022

Provided in-person and remote technical support for mobile devices, POS systems, and networking equipment across multiple retail locations. Diagnosed and resolved software, connectivity, and hardware issues on Android and iOS platforms. Assisted with device migrations, system updates, and routine configuration tasks. Documented support procedures to streamline issue resolution and improve team efficiency.

Technical Skills

- Languages: Python, Java, Bash, SQL, PowerShell, Javascript, React, HTML, CSS, C, C#, C++

- Tools/Technologies: Git, Linux, Microsoft 365 Admin Center, Active Directory, Azure, SQLite, Jira, Confluence
- Data Analysis: Excel, Power BI, Azure Data Studio, SQL queries, Snowflake
- DevOps: Bash scripting, System Automation, Endpoint Provisioning
