EXPERIENCE

FINANCIAL PLANNING ASSOCIATE | FIDELITY INVESTMENTS | Sept 2025 – Present

Work with 401(k) participants to plan out their retirement and investments guiding them towards financial success.

- Guide inactive and active 401(k) participants through all available options while exploring the wide range of services offered by Fidelity.
- Build customer relationships to identify retirement and investment needs then provide financial solutions in order for clients to achieve financial success.
- Obtain a wealth of knowledge from Fidelity coursework to prepare for FINRA: SIE, Series 7 and Series 66.

ASSOCIATE, DIGITAL TRANSFORMATION | SANTANDER BANK | Feb 2022 – Aug 2024

Evaluate business processes to find bottlenecks and inefficient procedures then develop projects tasked at bringing about streamlining and digitization to create a user friendly experience for the customer and Santander employees.

- Partnered with Subject Matter Experts to develop comprehensive tests covering critical functional components, and presented results to senior leadership, securing signoffs on test outcomes.
- Created and executed comprehensive test cases to validate end-to-end customer journeys between the Back Office and Customer Service Center, guaranteeing seamless functionality and user experience within Openbank and Appian Back Office interfaces.
- Collected and prioritized requirements and epics to drive the development of test scenarios, supporting the digital transformation objectives of Project Horizon.
- Lead projects for digitization from beginning to end by gathering senior leadership and subject matter experts, determining the final objective, setting milestones and transitioning from staging to live environments.

MORTGAGE ADMINISTRATOR SPECIALIST | DIGITAL FEDERAL CREDIT UNION | June 2021 – Jan 2022

Acted as Subject Matter Expert for Mortgage Point of Sale, Loan Origination System, and servicing systems, delivering specialized knowledge and guidance to optimize platform performance.

- Managed the administration, configuration, and maintenance of all systems, ensuring optimal performance.
- Administered all systems, including user role and access management, program and fee adjustments, document updates, and general setting enhancements to optimize system functionality.
- Collaborated with vendors for implementation, maintenance, and system enhancements, providing guidance on impacts to existing systems and processes, managing testing requirements, and overseeing successful deployments.
- Streamlined the onboarding process for new mortgage employees, consistently experiencing accelerated productivity and reduced ramp-up time.
- Developed, maintained, and validated the accuracy of reports to provide critical insights, enabling strategic and operational decision-making for the leadership team.
- Partnered with Information Systems to promptly address and resolve departmental technology challenges, enhancing overall operational efficiency.

DATA ANALYST | CITIZENS BANK | Feb 2019 – Oct 2020

Worked closely with subject matter experts to investigate and resolve exceptions identified during quality control reviews, ensuring accuracy and compliance.

- Performed quality control testing on Home Equity Lines of Credit transitioning from the draw period to repayment, identifying and addressing any exceptions to ensure accuracy and compliance.
- Researched exceptions to determine impacted accounts, identified patterns, and validated system issues against contract clauses for accurate resolution and compliance.
- Reviewed exceptions across various attributes, including late fees, rates, margins, disbursements, payment calculations, auto debits, and maturity dates, to identify discrepancies and ensure accurate processing.
- Designed and implemented two new control tests for newly onboarded HELOCs and established a clear escalation process for issue resolution.
- Collaborated with department heads from Loan Servicing, Risk, and Loan Originations to identify key attributes for testing and quality control.

BUSINESS CONTROLS ANALYST | SANTANDER BANK | Sept 2016 – Jan 2019

Developed reports for all referred credit card applications from applications to decisioning, pulled data from SAS data lake to ensure bank response was within compliance. Followed up and remediated all applications with the call center, underwriting, IT and Risk by having key knowledge on remediations with each department

- Efficiently analyzed decision referrals, uploaded required documents, and saved changes in FICO OM in a timely manner, while assessing Debt-to-Income ratios, verifying income, and reviewing credit reports via Experian, TransUnion, or The Work Number.
- Identified, documented, and resolved issues in the Underwriting queue (CAP & CICLI), including missing decisions in SPP after declines, approved applications not appearing for review, and missing Fraud Net Score or PID in FICO OM.
- Collaborated with the Underwriting team to organize priorities for Pending Review and Appealed applications by creating a report that tracks application age and origination source (Internet, Direct Mail, or Branch Region), streamlining the review process.
- Created and implemented a daily tracking system for Customer Initiated Credit Limit Increase applications, ensuring timely reviews by underwriters and improving overall decision efficiency through consistent follow-up with application teams.
