

Kevin (Hai) Lin

Address: 9200 Garden Ranch Ct. 78749 Austin, TX

Cell: 8433273904 Email: linkevin2013@gmail.com

SUMMARY

Experienced Biostatistician and Bioinformatics Analyst with over 20 years of experience supporting cancer research. Proven expertise in high-throughput sequencing (NGS) data analysis, including RNA-Seq, ATAC-Seq, ChIP-Seq/CUT&RUN, RRBS, and WGBS. Key contributor to over 40 projects annually at MD Anderson Cancer Center, collaborating with 20+ research labs to deliver statistical analysis, data visualization, and integrative genomics insights. Strong background in R, SAS, and Linux/HPC environments. Co-author on numerous high-impact publications in Nature Communications, Nature Cancer, Leukemia, and Cancer Research.

EDUCATION

M.S. in Biostatistics

Medical University of South Carolina, Charleston, SC (Aug. 2001 – May 2004)

RESEARCH AND PROFESSIONAL EXPERIENCE

Senior Statistical Analyst *Department of Epigenetics and Molecular Carcinogenesis - MD Anderson Cancer Center, Smithville, TX (2013–2021); Houston, TX (2021–Present)*

- Key analyst for ~40 annual NGS projects using ATAC-Seq, ChIP-Seq/CUT&RUN, RNA-Seq, microRNA-Seq, RRBS, and WGBS data
- Provide statistical and bioinformatics support to 20+ research labs annually
- Guide downstream analysis including pathway interpretation, heatmaps, clustering, and data integration
- Supported the Science Park Research Division through statistical consulting and quality control
- Developed NGS workflows and data pipelines as part of growing genomic initiatives

Research Statistical Analyst *Department of Molecular Carcinogenesis - MD Anderson Cancer Center, Smithville, TX (2004–2012)*

- Sole statistician on campus for 8 years, providing data analysis and gene expression comparisons
- Created visual data representations for conferences, internal reports, and grant submissions

Biostatistician (SAS & MATLAB Programming) *Medical University of South Carolina (2003–2004)*

- Designed and executed statistical models for epidemiological studies
- Supported collaborative data analysis across biometry and epidemiology teams

Research Assistant & Data Analyst *Medical University of South Carolina (2001–2004)*

- Provided statistical consulting and data management in support of clinical research

- Conducted power analyses and data visualization for publication and presentation

RELEVANT SKILLS

Bioinformatics & NGS Analysis

- NGS data processing, quality control, and integration
- RNA-Seq, ATAC-Seq, ChIP-Seq/CUT&RUN, RRBS, WGBS analytical pipelines
- R (Bioconductor), Linux/Unix scripting, HPC environments
- Data visualization and pathway analysis

Statistical Expertise

- Power & sample size estimation
- Data management and quality checks
- Statistical inference and multi-platform data integration
- SAS, MATLAB, R

PRESENTATIONS AND AWARDS/HONORS

Lin Hai and Slate, E.H. "A Comparison of Estimators of Population Slope under Informative Dropout," Joint Statistical Meetings, Minneapolis, MN, August 7-11 2005. (Winner of a Student Travel Award from the Section on Health Policy Statistics of the American Statistical Association.)

Knapp, R.G., Brawman-Mintzer, O., Slate, E.H. and Lin, Hai. "Methodologic Considerations in a GAD Treatment Trial," Annual meeting of the American Psychiatric Association, New York, May 2004.

Brawman-Mintzer, O., Knapp, R.G., Slate, E.H. and Lin, Hai. "Methodologic Considerations in a GAD Treatment Trial," New Clinical Drug Evaluation Unit (NCDEU) 44th Annual Meeting, Phoenix, AZ, Ju

Lin, Hai and Slate, E.H. "A comparison of estimators of population slope under informative drop-out" International Biometrics Society (ENAR), Pittsburgh, March, 2004.
