

KIMBERLY ATTA-PETERS

Kimberlypeters07@gmail.com 2025 Dayton Avenue, St. Paul, MN +1 (763) 438-0522

PROFESSIONAL SUMMARY

A graduate student in Artificial Intelligence with hands on experience in Python, SQL, Machine learning and Data Visualization. Skilled in managing and analyzing complex datasets, building dashboards, and applying AI techniques to deliver actionable insights.

EDUCATION

University of St. Thomas

Master of Science, Artificial Intelligence

May 2024 – December 2026

Python Programing

Cloud Computing (AWS)

Database Management Systems and Design

Data Preparation and Analysis

Data Visualization

Machine learning

AI Ethics

Wisconsin International University of College, Ghana

Bachelor of Laws

August 2014-May 2018

First Class Honor(s)

University of Ghana

Bachelor of Arts (Information Systems & Psychology)

August 2012-May 2016

Second Class

PROFESSIONAL EXPERIENCE

University of St. Thomas

St. Paul, Minnesota

Graduate Research Assistant, Undergraduate Research Opportunities Program

May 2025 – Present

- Utilize Python, SQL and Excel to clean, analyze and manage large datasets related to undergraduate research grants
- Create automated workflows using Power Automate, integrated with SharePoint and Salesforce, to streamline data collection and application processing
- Create data visualizations and dashboards using Power BI and Tableau for the annual report to highlight key performance indicators(KPIs) in research participation and funding allocation
- Analyze datasets related to research grants awarded academic year to identify trends, track program growth and support decision making

University of St. Thomas

St. Paul, Minnesota

Graduate Research Assistant, International Admissions

June 2024 – May 2025

- I used SQL to analyze the university's international undergraduate admissions database, uncovering trends that provided valuable insights and helped admissions counselors increase enrollment rates by 10%
- Assisted in managing student records and processing application documents using tools such as SharePoint, Salesforce and Banner
- Visualized the student database with python programming to communicate key insights
- Served as an in-house International admissions staff during recruitment travel season

Tuspa Company Limited

Accra, Ghana

IT Specialist Assistant, IT Department

February 2023 – April 2024

- Implemented robust security measures
- Set up data storage and retrieval protocols, adjusting permissions and maintaining data security

- Conducted daily analysis of computer systems to determine overall functionality of systems requirements
- Managed user permissions by creating and monitoring access logs
- Conducted trainings on new technologies and software that increased performance rate by 20%

Legal Ink (Lawyers & Notaries)

Accra, Ghana

Paralegal

March 2020 – December 2022

- Assisted lawyers in preparing case files by gathering and organizing statutes, precedents and legal documents from courts and registries
- Drafted legal correspondence, affidavits, and preliminary contracts under supervision, ensuring compliance with legal and procedural requirements
- Conducted background research on laws, regulations, and case law to support litigation strategies and client advisory services
- Attended court proceedings and client meetings, tracked case progress and provided logistical and administrative support to the legal teams

PROJECT -BCG GENAI JOB SIMULATION ON FORAGE- SEPTEMBER 2025

Project Title: Develop a chatbot to assist with financial inquiries with the GenAI team at BCG X.

Project Objective: A job simulation involving AI-powered financial chatbot development for BCG's GenAI Consulting team. Integrated and interpreted complex financial data from 10-K and 10-Q reports, employing rule based logic to create a chatbot that provides user friendly insights and analysis.

Skills: Python, Jupyter, Data Extraction, Financial Analysis, Natural Learning Processing, Chatbot Development

PROJECT (SQL)- DECEMBER 2024

Project Title: Data Modeling and Analysis of University of St. Thomas International Undergraduate Admissions

Project Objective: To design, implement, and analyze a relational database system to effectively store and manage data related to the University of St. Thomas's international undergraduate admissions process.

Skills: Data Modeling, Database Implementation, Query Design and Analysis

MEMBERSHIP

IEEE Women In Engineering (WIE), Organizing Committee member TC

TECHNICAL SKILLS

Skills: Python, SQL, AWS, Excel, Tableau, MS PowerBI, Big Data, Data Analysis, MS PowerPoint, Outlook
