Stakeholder collaboration, project management, process improvement, storytelling with data

## Professional Summary

Results-driven Senior Business Intelligence Developer with 10+ years of experience transforming complex data into strategic insight. Expert in Power BI, Tableau, SQL, Snowflake, and Looker, with a strong track record of designing scalable dashboards, leading enterprise reporting, and driving data-led business decisions. Adept at stakeholder alignment, data ecosystems (AWS, Azure, BigQuery).

## Work Experience

### FedEx

Business Intelligence Developer  
Memphis, TN

#### Feb 2021 – Present

Built executive-level dashboards in Power BI, Tableau, and Looker to support software adoption tracking, incentive programs, and business unit performance metrics. Automated BI pipelines by integrating data from SQL Server, Oracle, Snowflake, and Azure to enable self-service analytics for cross-business stakeholder requirements across Revenue Management and Sales Enablement. Partnered with Marketing, Product, and Engineering to map BI solutions to campaign timelines, driving visibility into conversion and ROI impact. Led scoring model implementation using Adobe Analytics, Power BI, and QuickSight, assigning tier rankings to providers based on install and usage metrics.

## **Indigo Ag**

Business Intelligence Developer

Boston, MA (Remote)

**Jan 2019 – Nov 2020**

Designed new BI infrastructure from the ground up, driving the implementation of a Looker instance and modern data platform powered by Snowflake. Conducted data validation and historical analysis to reduce redundancy and improve supply chain reporting accuracy. Developed proprietary data marts on Tableau Server aligned with functional teams. Delivered real-time dashboards in Looker and Power BI, providing the operations team with actionable metrics across inventory and fulfillment. Advised leadership on data architecture strategy and visual best practices for end-user adoption.

## **Pandora (SiriusXM)**

Metadata Analyst / BI Support

Oakland, CA

**Feb 2015 – Nov 2017**

Maintained metadata integrity for Pandora's premium rollout using internal tools and Tableau Server reporting models. Conducted A/B testing and root cause analysis to support feature release optimization and user segmentation. Created data visualizations to evaluate the impact of metadata quality on Pandora's recommendation engine performance.

## **Education**
