

Lakshmi Nishevitha Amirthalingam Ganeshrajan

+1 6027853027 | lamirtha@asu.edu | Tempe, AZ | <http://linkedin.com/in/lakshmi-nishevitha-ag/>

SUMMARY

Graduate student in Data Science at Arizona State University with hands-on experience in Python, SQL, Power BI, and Excel. Skilled in automating reports, performing data analysis, and supporting AI and ML initiatives focused on NLP and automation. Adept at translating complex datasets into actionable insights through dashboards and machine learning workflows.

EDUCATION

Master of Data Science, Analytics, and Engineering(Electrical Engineering) 08/2024 - 05/2026
Arizona State University, Tempe, Arizona GPA: 3.22
Relevant courses: Statistical Machine Learning, Mathematical Foundations of Machine Learning, Time Series Forecasting
Bachelor of Electronics and Communications Engineering 08/2017 - 06/2021
Anna University, Chennai, India CGPA: 3.37
Relevant courses: Problem Solving and Python Programming, Machine Learning Techniques, Data Structures in C

EXPERIENCE

Data Analyst Intern- Bigtapp Analytics, United States 07/2025 - Present
- Contributed to the development of an AI-powered document Q&A agent using Agno, FAISS, and Sentence Transformers to embed and retrieve context from PDFs, supporting integration with Google Gemini for generative responses.
- Assisted in implementing modular AI agent pipelines for text processing and interactive Q&A, helping optimize embeddings and query handling for efficiency.
- Supported troubleshooting and validation of ML workflows in Python, improving the reliability and accuracy of information retrieval from unstructured data.
Process Executive- Infosearch, India 08/2022 - 12/2022
- Coordinated and administered over 30 surveys to analyze sales of targeted products across U.S. supermarket platforms, ensuring data accuracy and quality, resulting in valuable insights that informed key strategic decisions.
- Assisted in preprocessing and annotating large datasets for machine learning models, improving model accuracy by 12% and supporting better predictive capabilities for business use cases.
- Supported operational performance reviews through visual reports and data storytelling.

SKILLS

Technical Skills: Database Management, Exploratory Data Analysis, Data Visualization, Data Warehousing, Machine Learning, Deep Learning, Sentiment Analysis, Natural Language Processing, Feature Engineering, KPI Tracking & Metrics, Predictive Modeling, Statistical Analysis, Advanced Excel
Tools: SQL, Python, R, C, C++, Power BI, Tableau, Qlik Sense, MATLAB, Snowflake, Visual Studio Code, PyTorch, TensorFlow, HTML, Swagger UI, Oracle, Salesforce, Looker, Microsoft Office Suite, Google Analytics
Certifications: Certification Program in Data Analytics by EduBridge Learning Pvt Ltd, Microsoft Power BI -The Complete Masterclass by Udemy

ACADEMIC PROJECTS

Insurance Prediction with Machine Learning 12/2023 - 04/2024
- Performed ETL (Extract, Transform, Load) on a dataset of 10,000 entries by extracting the raw data, transforming it by removing 500 duplicates and addressing 5% missing values, and loading the cleaned data into the analysis pipeline, improving data quality.
- Achieved 85% accuracy using Gradient Boosting Classifier, enhancing predictions by 10%.
- Transformed the dataset using SelectKBest to identify the top 5 features impacting travel insurance purchases, which informed model insights, and developed an interactive Power BI dashboard to visualize key trends, enabling better reporting and supporting market research insights.
Handwritten Text to Braille Conversion 12/2020 - 03/2021
- Developed an image processing model using Python and TensorFlow to convert handwritten text into Braille, achieving 92% character recognition accuracy.
- Applied neural network techniques, showcasing ability to handle complex modeling challenges.
