PROFESSIONAL SUMMARY:

I am a motivated and skilled Software Developer with 5+ years of experience in Software Development, Automation Testing, and IT Support. Proven expertise in Java, Selenium WebDriver, SQL, and PL/SQL, with hands-on experience in backend validation and data integration. Proficient in Agile/Scrum methodologies, including sprint planning, user story estimation, and collaborative team environments. Experienced in test planning, defect management, and regression testing. I am skilled in creating dashboards and analytics using tools like Power BI to track KPIs and project metrics.

Technical SKILLS:

- **ERP:** Oracle EBS, Oracle Fusion (basic exposure), Oracle Integration Cloud (OIC), APEX
- **BI & Reporting:** Power BI, BIP, OTBI, BI Publisher, Reports6i/10g
- **Languages:** SQL, PL/SQL, Java, HTML, XML, OAF
- **Scripting:** Unix Shell Scripting, JavaScript
- **Tools & Utilities:** SQL Loader, SQL Plus, TOAD, Putty, WinSCP, Eclipse
- **Methodologies:** Agile, Scrum, SDLC, Defect Management, Test Automation
- **Cloud:** OIC, APEX

Soft Skills: Analytical Thinking, Problem-Solving, Attention to Detail, Communication, Teamwork, Adaptability, Time Management, Critical Thinking, Agile Mindset, Technical Documentation.

PROFESSIONAL EXPERIENCE:

Software Developer /Capgemini, Hyderabad, India

Jan 2020–Feb2023

- Designed, developed, and maintained automation frameworks for web applications using Selenium WebDriver and Java.
- Developed SQL queries and scripts for backend data validation, ensuring consistency across multiple environments.
- Participated in requirement gathering and collaborated with business and functional teams.
- Executed functional, regression, and integration tests, documenting defects and coordinating with developers.
- Created Power BI dashboards to track test coverage, defect trends, and sprint performance metrics.
- Improved testing efficiency and reduced manual effort by 35-40% through automation.
- Worked in Agile/Scrum environments, attending sprint planning, stand-ups, and retrospectives.
- Mentored junior team members in automation best practices, SQL queries, and test case design.

Analyst/Capgemini Hyderabad, India

May 2018 -Jan2020

- Supported senior developers in building test frameworks and scripts to validate ERP-related workflows.
- Supported senior developers in building test frameworks and scripts for ERP workflows. Collaborated on designing reusable components for automated tests. Focused on validating business processes within ERP modules. Enhanced testing efficiency and reduced manual effort.
- Developed and executed test cases, logged defects, and performed root cause analysis. Worked closely with QA and development teams to ensure issue resolution. Used tools like JIRA and Testing for tracking and reporting.

- Helped improve software reliability and user satisfaction.
- Collaborated with solution architects and developers to design robust technical solutions. Ensured designs were scalable, efficient, and aligned with business goals. Participated in technical discussions and requirement clarifications. Played a key role in turning business logic into working systems.
- Assisted in automation testing and web application development using Java and Selenium WebDriver. Gained hands-on experience with test automation for functional and regression testing. Ensured code quality and test coverage met project standards. Contributed to faster and more reliable deployment cycles.
- Assisted in the configuration and testing of Oracle ERP modules such as Financials, Procurement, Supply Chain.
- Connected Power BI to Oracle databases and performed real-time data refreshes. Imported and transformed ERP data using Power Query and DAX expressions.
- Learned and applied SQL queries to extract and manipulate ERP-related data. Worked alongside ERP consultants and BI analysts to support ongoing projects.
- Gained exposure to business processes such as Order-to-Cash and Procure-to-Pay. Strengthened skills in problem-solving, data analysis, and technical documentation.

COLLEGE INTERN PROJECTS:

Sales Forecasting & Profitability Analysis Using Power BI

Jan2025–May 2025

Campbellsville University

- Collected simulated ERP sales and expense data to develop a predictive Power BI model for quarterly revenue forecasting.
- Used Power Query and DAX to clean, transform, and model data for advanced trend and variance analysis. Implemented visualizations such as forecast charts, profit margin heat maps, and dynamic filters for executive reporting.
- Improved forecast accuracy by 15% compared to manual Excel models and demonstrated actionable insights for decision-making.

ERP-Based Business Intelligence Dashboard Development

Campbellsville University

Aug2024–Dec2024

- Developed a Power BI dashboard that is integrated with Oracle ERP data to provide real-time business insights across Finance, Procurement, and Inventory modules.
- Built data models and created visualizations to track KPIs such as purchase order status, inventory turnover, and budget variance.
- Enabled dynamic filtering and drill-down features for end-users, improving report usability and reducing manual analysis time by 50%.

Purchase Order Workflow Automation Using Oracle ERP

Jan2024–Apr2024

Campbellsville University

- Simulated a real-world ERP scenario by configuring an automated purchase order (PO) workflow in Oracle ERP Cloud.
- Mapped the Procure-to-Pay cycle, defining business rules, approval hierarchies, and exception handling logic within the ERP system.
- Validated the workflow with test transactions and monitored process efficiency, identifying 25% faster processing compared to manual entry.
- Documented the entire process using flowcharts and configuration logs to demonstrate ERP customization and automation capabilities.

EDUCATION:

Master of Science in Computer Science and information technology.
Campbellsville University, Kentucky.

GPA-3.3/4.0
Aug 2023–May 2025

Relevant course work: Software Engineering, Advanced Database Systems, and Networking applied in ERP-based academic projects involving Oracle ERP, Power BI, and data modeling.

Bachelor of Technology in Computers Science and Engineering.
Sri Chandrasekharendra Saraswathi Viswa Mahavidyalaya (SCSVMV)

GPA-7.8/10.0
May2016 –July 2020

CERTIFICATIONS:

- **Microsoft Certified: Power BI Data Analyst Associate.**
